ACKNOWLEDGMENTS

The *County and City Data Book* was prepared under the direction of Edwin D. Goldfield, Chief, Statistical Reports Division. Compilation was under the supervision of William Lerner, Assistant Chief, assisted by Dorothy M. Belzer for editorial supervision and O. Halbert Goolsby for planning and review.

The cooperation of many persons who contributed to the preparation of this volume is gratefully acknowledged. The specific sources shown for each item indicate the various government and private agencies which contributed information and assistance.

June 1962.

NO 1 6 '62

County and City Data Book, 1962

Introduction

This volume is the sixth in the *County and City Data Book* series. Its primary purpose is to provide for convenient reference a selection of recent statistical information for counties, cities, and other relatively small geographic areas. For each county, 161 statistical items are presented; for each incorporated city with 25,000 inhabitants or more, 163 items are presented. Items identical with those for counties are also presented for regions, divisions, States, and standard metropolitan statistical areas, except that for the last, the data on mineral industries and agriculture are omitted. Population and housing items identical (with minor exceptions) with those for incorporated cities are also presented for urbanized areas and unincorporated places.

Descriptive text and source notes are included to help the user better interpret the figures shown. The publications cited as sources usually contain additional statistical detail and a more complete discussion of definitions and concepts than can be presented here.

Selection of data.—In general, the items selected for inclusion in this volume are those for which the statistics—

1. Represent the most generally useful individual summary measures;
2. Are available in comparable form for all counties or for all cities;
3. Offer potentialities for fruitful analysis when combined or compared with the other statistics selected.

The items selected represent the judgment of many individuals and organizations. Experience acquired in preparing and using the previous editions in the series also proved helpful.

Most of the statistics in this volume were obtained from the latest Censuses of Agriculture, Business, Governments, Housing, Manufactures, Mineral Industries, and Population. However, the book is not restricted to census sources. Also presented are recent data from other governmental and private agencies, among which are: Department of Agriculture, Board of Governors of the Federal Reserve System, Federal Home Loan Bank Board, Federal Power Commission, Public Health Service, Weather Bureau, American Hospital Association, and Governmental Affairs Institute.

Arrangement of tables.—Although six tables and several appendixes are presented, two tables form the basic framework of this volume: The county table (table 2), which presents 161 items of information for each county; and the city table (table 6), which presents 163 items for each city having 25,000 inhabitants or more in 1960. (See "Column Headings," pp. IV–VIII.)

To simplify finding of statistics and comparisons among areas, each table shows as much as possible of the same kind of information as each other table, in as nearly the same sequence as possible. The differences in content among tables 1 and 2 (which present identical items), table 3 (which is identical with tables 1 and 2 except for the omission of mineral industry and agriculture data), tables 4 and 5 (which are restricted to population and housing data), and table 6 are primarily due to the nonavailability or nonapplicability of some of the data for some of the types of areas covered. For example, data for presidential vote cast are available for counties, but not for urbanized areas or cities. A few differences in content reflect the greater importance of particular items for one type of area as against others.

Each item is identified by a number. Items in tables 1, 2, and 3 are numbered 1 to 161. Those in tables 4 and 5 are numbered 201 to 267. Those in table 6 are numbered 301 to 463. The numbers are used not only as a finding device but to identify the applicable portions of the text material appearing under "Source Notes and Explanations."

Appendixes.—A number of appendixes are included to expand or explain the coverage of the tables.

Appendix A is in two parts. Part 1 presents the population of the cities shown in the city table (table 6) with the cities arranged according to rank order of population. Part 2 provides a complete list of all urban places identified in the 1960 Census of Population, arranged alphabetically by State, and shows their population and county in which located.

Appendix B presents a classification of the units presented as "counties" in table 2 by their official government status. In order to include all of the first-level subdivisions of States, the "county" table includes a number of "independent cities," "Federal areas," "city-counties," and other special cases. These are included also, where appropriate, in the city table.

Appendix C is included because some of the cities in the city table do not have weather stations. To present climatological data for such cities, nearby stations having similar weather conditions were substituted. Appendix C lists cities for which substitutions were made and identifies the weather station substituted.

Appendix D presents a list of the standard metropolitan statistical areas (see "Geographic Concepts and Codes," p. XI, together with their constituent counties and independent cities; or in the case of New England SMSA's, towns and cities.

Maps.—A map for each State appears in the final section of this volume. Each map shows the names and boundaries of all counties and standard metropolitan statistical areas, and the name and location of each city having 25,000 inhabitants or more.

Three maps appear in the front part of the volume for the United States as a whole. The first shows boundaries of geographic regions, divisions, and States; the second, the name and location of all standard metropolitan statistical areas; and the third, the name and location of all urbanized areas.

Availability of punchcards and computer tapes.—During the preparation of the *Data Book*, the statistics presented for tables 2 to 6 were placed on standard IBM 80-column punchcards. The items included on the punchcards are arranged in 10 major subject matter groups for all counties, 8 major groups for all standard metropolitan statistical areas, 4 major groups for urbanized areas and unincorporated urban places, and 10 major groups for cities, each group corresponding to the headings for one page as shown in the published tables. The data contained in each subject matter group are punched into 2 cards and follow the identical sequence of the column headings shown here (see pp. IV–VIII) for each of the tables. Thus the data for all subjects are spread over a total of 20 cards for any one county or city, 16 cards for any one standard metropolitan statistical area, and 8 cards for any one urbanized area or unincorporated urban place.

These cards are available on a cost-of-reproduction basis. The estimated cost of a reproduction of the entire set (approximately 82,000 cards) is $850 plus shipping costs. However, it is not necessary to purchase the entire set. Selections can be made of particular items or of specified areas with a proportionate reduction in cost, or various items can be combined into one or more cards at cost.

The preparation of a computer tape file containing all or part of the data presented on the punchcards and in the *Data Book* can also be arranged.

For more information concerning cost of punchcards or computer tapes, compatibility of tapes with various computers, or other such matters, write to: Chief, Statistical Reports Division, Bureau of the Census, Washington 25, D.C.

Relationship to other *Abstract* publications.—The annual *Statistical Abstract of the United States* is, of necessity, limited primarily to the presentation of current data for the country as a whole. To a much lesser extent, it presents data for regions, divisions, and States and for historical series. The supplements to the annual *Abstract* have broadened its scope both geographically and historically.

In addition to the *County and City Data Book*, another small-area supplement, *Congressional District Data Book*, the first of a new series, presents for all 437 congressional districts as constituted in 1960 a summary of data from the most recent censuses. A second edition of the *Congressional District Data Book* relating to districts as constituted in 1962 is now in the planning stage and tentatively scheduled for issuance in 1963.

The historical supplement currently in circulation is *Historical Statistics of the United States, Colonial Times to 1957.* This is a completely revised and expanded version of *Historical Statistics of the United States, 1789–1945*, issued in 1949. Compiled by the Bureau of the Census with the cooperation of the Social Science Research Council, the new volume presents historical data on every major aspect of the Nation's social and economic development.

Responsibility.—The contents of this volume are taken from a number of sources, as indicated under "Source Notes and Explanations." The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. The responsibility for selection of the material and for proper presentation, however, rests with the Bureau.

Comment and criticism.—In the planning of revisions of a standard volume, the compiling agency finds it particularly helpful to receive the reactions of the users of each edition. To this end, users of this volume are encouraged to send in their suggestions, comments, and criticisms.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note in the descriptive text for the given statistical series.

SUGGESTIONS AND COMMENTS

should be sent to:

The Director
Bureau of the Census
Washington 25, D.C.

STATISTICAL ABSTRACT PUBLICATIONS

Annual Volume

Statistical Abstract of the United States. Since 1878, the authoritative summary of statistics on the social, political, and economic organization of the United States. Includes a representative selection of statistics widely used by public officials, businessmen, educators, librarians, research workers, and students. 1962 issue now available. 1,045 pages, 43 maps and charts. Price $3.50 (Clothbound).

Historical Supplement

Historical Statistics of the United States, Colonial Times to 1957. Prepared with the cooperation of the Social Science Research Council. A compilation of more than 8,000 statistical time series, largely annual, on American social and economic development covering periods from 1610 to 1957. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical index. 801 pages. Issued 1960. Price $6.00 (Clothbound).

Small-Area Supplements

County and City Data Book, 1956. A compact presentation of 133 items of statistical data for each county in the United States, and 130 items for each of 484 cities having 25,000 or more inhabitants in 1950. Information comparable to that for counties is also presented for geographic regions, divisions, States, and standard metropolitan areas. Items included based largely on results of 1954 Censuses of Agriculture, Business, and Manufactures. Includes 51 maps, explanatory text, and source notes. Issued 1957. Price $4.50 (Clothbound).

Congressional District Data Book (Districts of the 87th Congress). A handy reference consisting of 135 statistical items for all 437 congressional districts as constituted in 1960; 72 items pertaining to nonwhite population for selected districts; and 125 items for the 297 districts whose boundaries follow county lines. Based largely on results of the most recent censuses. Includes text and source notes. 176 pages. Out of print.

Purchase orders should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C.

Geographic Concepts and Codes

AREAS FOR WHICH STATISTICS ARE PRESENTED

Regions, divisions, and States.—The geographic groupings of States by regions and divisions as shown in table 1 are the standard groupings used by the Bureau of the Census. Under this arrangement, the United States is first divided into four regions. The regions are divided, in turn, into a total of nine geographic divisions, each of which is composed of a specific group of contiguous States. (See map, p. XII.)

Standard metropolitan statistical areas.—For many types of analysis, the entire area in and around a city, in which the activities form an integrated economic and social system, needs to be considered as a unit. Prior to the 1950 Censuses of Population and Housing, areas of this type had been defined in different ways for different purposes and by various agencies. Leading examples were the metropolitan districts of the 1940 Census of Housing, the industrial areas of the Census of Manufactures, and the labor market areas of the Bureau of Employment Security. To permit all Federal statistical agencies to utilize the same areas for the publication of general-purpose statistics, the Bureau of the Budget has established "standard metropolitan statistical areas" (SMSA's). Every city of 50,000 inhabitants or more according to the 1960 Census of Population is included in an SMSA.

The definitions and titles of standard metropolitan statistical areas are established by the Bureau of the Budget with the advice of the Federal Committee on Standard Metropolitan Statistical Areas. This Committee is composed of representatives of the major statistical agencies of the Federal Government. The criteria used by the Bureau of the Budget in establishing the SMSA's are presented below. (See the Bureau of the Budget publication, *Standard Metropolitan Statistical Areas*, U.S. Government Printing Office, Washington 25, D.C., 1961.)

The definition of an individual SMSA involves two considerations: First, a city or cities of specified population to constitute the central city and to identify the county in which it is located as the central county; and second, economic and social relationships with contiguous counties which are metropolitan in character, so that the periphery of the specific metropolitan area may be determined.[1] SMSA's may cross State lines.

Population criteria.—The criteria for population relate to a city or cities of specified size according to the 1960 Census of Population.

1. Each standard metropolitan statistical area must include at least:

a. One city with 50,000 inhabitants or more, or

b. Two cities having contiguous boundaries and constituting, for general economic and social purposes, a single community with a combined population of at least 50,000, the smaller of which must have a population of at least 15,000.

2. If each of two or more adjacent counties has a city of 50,000 inhabitants or more (or twin cities under 1b) and the cities are within 20 miles of each other (city limits to city limits), they are to be included in the same area unless there is definite evidence that the two cities are not economically and socially integrated.

Criteria of metropolitan character.—The criteria of metropolitan character relate primarily to the attributes of the contiguous county as a place of work or as a home for a concentration of nonagricultural workers.

3. At least 75 percent of the labor force of the county must be in the nonagricultural labor force.[2]

4. In addition to criterion 3, the county must meet at least one of the following conditions:

a. It must have 50 percent or more of its population living in contiguous minor civil divisions[3] with a density of at least 150 persons per square mile, in an unbroken chain of minor civil divisions with such density radiating from a central city in the area.

b. The number of nonagricultural workers employed in the county must equal at least 10 percent of the number of nonagricultural workers employed in the county containing the largest city in the area, or the county must be the place of employment of 10,000 nonagricultural workers.

c. The nonagricultural labor force living in the county must equal at least 10 percent of the number in the nonagricultural labor force living in the county containing the largest city in the area, or the county must be the place of residence of a nonagricultural labor force of 10,000.

5. In New England, the city and town are administratively more important than the county, and data are compiled locally for such minor civil divisions. Here, towns and cities are the units used in defining standard metropolitan statistical areas. In New England, because smaller units are used and more restricted areas result, a population density criterion of at least 100 persons per square mile is used as the measure of metropolitan character.

Criteria of integration.—The criteria of integration relate primarily to the extent of economic and social communication between the outlying counties and central county.

6. A county is regarded as integrated with the county or counties containing the central cities of the area if either of the following criteria is met:

a. Fifteen percent of the workers living in the county work in the county or counties containing central cities of the area, or

b. Twenty-five percent of those working in the county live in the county or counties containing central cities of the area.

Only where data for criteria 6a and 6b are not conclusive are other related types of information used as necessary. This information includes such items as average telephone calls per subscriber per month from the county to the county containing

---

[1] Central cities are those appearing in the standard metropolitan statistical area title. A "contiguous" county either adjoins the county or counties containing the largest city in the area, or adjoins an intermediate county integrated with the central county. There is no limit to the number of tiers of outlying metropolitan counties so long as all other criteria are met.

[2] Nonagricultural labor force is defined as those employed in nonagricultural occupations, those experienced unemployed whose last occupation was a nonagricultural occupation, members of the Armed Forces, and new workers.

[3] A contiguous minor civil division either adjoins a central city in a standard metropolitan statistical area or adjoins an intermediate minor civil division of qualifying population density. There is no limit to the number of tiers of contiguous minor civil divisions so long as the minimum density requirement is met in each tier.

central cities of the area; percent of the population in the county located in the central city telephone exchange area; newspaper circulation reports prepared by the Audit Bureau of Circulation; analysis of charge accounts in retail stores of central cities to determine the extent of their use by residents of the contiguous county; delivery service practices of retail stores in central cities; official traffic counts; the extent of public transportation facilities in operation between central cities and communities in the contiguous county; and the extent to which local planning groups and other civic organizations operate jointly.

Criteria for titles.—The criteria for titles relate primarily to the size and number of central cities.

7. The complete title of an SMSA identifies the central city or cities and the State or States in which the SMSA is located:

a. The name of the standard metropolitan statistical area includes that of the largest city.

b. The addition of up to two city names may be made in the area title, on the basis and in the order of the following criteria:

(1) The additional city has at least 250,000 inhabitants.

(2) The additional city has a population of one-third or more of that of the largest city and a minimum population of 25,000, except that both city names are used in those instances where cities qualify under criterion 1b. (A city which qualified as a secondary central city in 1950 but which did not qualify in 1960 has been temporarily retained as a central city.)

c. In addition to city names, the area titles will contain the name of the State or States in which the area is located.

SMSA maps and definitions.—The location of SMSA's in the country as a whole is shown in the map on p. XIV; for identification and location of SMSA's in each State, see individual maps of States beginning on p. 619.

The exact composition of each SMSA is shown in Appendix D.

Standard consolidated areas.—In view of the special importance of the metropolitan complexes around New York and Chicago, the Nation's largest cities, several contiguous SMSA's and additional counties that do not appear to meet the formal integration criteria but do have strong interrelationships of other kinds have been combined into the New York–Northeastern New Jersey and Chicago–Northwestern Indiana Standard Consolidated Areas, respectively. The former is identical with the New York–Northeastern New Jersey SMA of 1950, and the latter corresponds roughly to the Chicago SMA of 1950 (two more counties having been added).

State economic areas.—State economic areas are relatively homogeneous subdivisions of States. They consist of single counties or groups of counties which have similar economic and social characteristics. The boundaries of these areas have been drawn in such a way that each State is subdivided into relatively few parts, with each part having certain significant characteristics which distinguishes it from adjoining areas.

The State economic areas have been designed for use in tabulating and publishing census data of various types and for other purposes. In this volume, these areas and their components are identified only by codes and not by specific listing.

The grouping of the counties or equivalent subdivisions of the United States into State economic areas is the product originally of a special study sponsored by the Bureau of the Census in cooperation with the Bureau of Agricultural Economics and several State and private agencies for the 1950 censuses.[4] The 1960 set of SEA's represents a limited revision of the 1950 areas. This revision takes into account changes in the definitions of SMSA's.

The combination of counties into State economic areas has been made for the entire country, and in this process the larger standard metropolitan statistical areas (those in 1960 with a central city of 50,000 or more and a total population of 100,000 or more) have been recognized as metropolitan State economic areas. When a standard metropolitan statistical area is located in two or more States, each State part becomes a metropolitan State economic area. In New England this correspondence does not exist because State economic areas are composed of counties, whereas standard metropolitan statistical areas are composed of towns. Here a county with more than half its population in one or more standard metropolitan statistical areas is classified as a metropolitan State economic area if the county or combination of counties containing the standard metropolitan statistical area or areas has 100,000 inhabitants or more.

Counties.—The primary divisions of the States are, in general, termed counties. In Louisiana, these divisions are known as parishes. Alaska is divided into 24 election districts, included here as the equivalents of counties. Some data for Alaska are not available by election districts but are available for its former 4 judicial divisions. In such cases data for the latter are shown.

In some States, there are cities which are independent of any county organization and thus constitute primary divisions of their States, namely, Baltimore in Maryland, St. Louis in Missouri, and 32 cities in Virginia. The District of Columbia also is included here as the equivalent of a county, as are the 3 parts of Yellowstone National Park in Idaho, Montana, and Wyoming. In 1960, there were 3,072 counties and parishes in the United States and 62 county equivalents, making a total of 3,134 (excluding the 4 judicial divisions in Alaska). See Appendix B for further detail.

Between 1950 and 1960, the number of counties declined by three—Armstrong County, S. Dak., was annexed by Dewey County; Elizabeth City County, Va., was consolidated with Hampton city; and Warwick County, Va., was consolidated with Newport News city. During the same period, county equivalents in conterminous United States increased by five, as five cities in Virginia—Covington, Galax, Norton, South Boston, and Virginia Beach—became independent of county organization.

Urbanized areas.—Although the major objective of the Bureau of the Census in delineating urbanized areas was to provide a better separation of urban and rural population in the vicinity of the larger cities, individual urbanized areas have proved to be useful statistical areas. They correspond to areas called "conurbations" in some other countries. An urbanized area contains at least one city of 50,000 inhabitants or more in 1960,[5] as well as the surrounding closely settled incorporated places and unincorporated areas that meet the criteria listed below. An urbanized area may be thought of as divided into the central city or cities, and the remainder of the area, known as the urban fringe. All persons residing in an urbanized area are included in the urban population.

For the 1960 Census, urbanized areas were delineated in terms of the census results rather than on the basis of information available prior to the census, as was done in 1950. A peripheral zone was drawn around each 1950 urbanized area and around cities that were presumably approaching a population of 50,000. Within the unincorporated parts of this zone small enumeration

---

[4] For further discussion and materials on State economic areas and their uses, see Bureau of the Census, *State Economic Areas,* U.S. Government Printing Office, Washington, D.C., 1951.

[5] There are a few urbanized areas where there are "twin central cities," neither of which has a population of 50,000 or more but that have a combined population of at least 50,000.

DEPARTMENT OF COMMERCE

districts were established, usually including no more than 1 square mile of land area and no more than 75 housing units.[6]

Arrangements were made to include within the urbanized area those enumeration districts meeting specified criteria of population density as well as adjacent incorporated places. Since the urbanized area outside incorporated places was defined in terms of enumeration districts, the boundaries for the most part follow such features as roads, streets, railroads, streams, and other clearly defined lines which may be easily identified by census enumerators in the field and often do not conform to the boundaries of political units.

In addition to its central city or cities, an urbanized area also contains the following types of contiguous areas, which together constitute its urban fringe:

1. Incorporated places with 2,500 inhabitants or more.
2. Incorporated places with less than 2,500 inhabitants, provided each has a closely settled area of 100 housing units or more.
3. Towns in the New England States, townships in New Jersey and Pennsylvania, and counties elsewhere which are classified as urban.
4. Enumeration districts in unincorporated territory with a population density of 1,000 inhabitants or more per square mile. (The areas of large nonresidential tracts devoted to such urban land uses as railroad yards, factories, and cemeteries were excluded in computing the population density of an enumeration district.)
5. Other enumeration districts in unincorporated territory with lower population density provided that they served one of the following purposes:
    a. To eliminate enclaves,
    b. To close indentations in the urbanized areas of 1 mile or less across the open end, and
    c. To link outlying enumeration districts of qualifying density that were no more than 1½ miles from the main body of the urbanized area.

Contiguous urbanized areas with central cities in the same standard metropolitan statistical area are combined. Urbanized areas with central cities in different standard metropolitan statistical areas are not combined, except that a single urbanized area was established in the New York–Northeastern New Jersey Standard Consolidated Area, and in the Chicago–Northwestern Indiana Standard Consolidated Area.

The boundaries of the urbanized areas for 1960 do not conform to those for 1950, partly because of actual changes in land use and density of settlement, and partly because of relatively minor changes in the rules used to define the boundaries. In general, however, the urbanized areas of 1950 and 1960 are based on essentially the same concept, and the figures for a given urbanized area may be used to measure the population growth of that area.

Cities.—The designation "city," in general, refers to a political subdivision of a State within a defined area over which a municipal corporation has been established to provide general local government for a specific population concentration. "Cities" as used in this volume refers to those places which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin. The towns in these States are minor civil divisions similar to the townships in some States and are not necessarily thickly settled centers of population such as the cities, boroughs, towns, and villages in other States. In this volume, the cities for which data are included in table 6 are those having a population of 25,000 inhabitants or more as reported in the 1960 Census of Population. All cities included are incorporated.

Unincorporated urban places.—In advance of the enumeration for the 1960 Census of Population, the Bureau of the Census delineated the boundaries for densely settled population centers without corporate limits. This volume presents data only for such places having 25,000 inhabitants or more in 1960.

Urban places.—These places comprise all incorporated and unincorporated places having 2,500 inhabitants or more in 1960 and those towns, townships, and counties classified as urban in the 1960 Census of Population. For a definition of "urban," see text for Items 6–7 under the "Source Notes and Explanations" section.

A list of all urban places and their population appears in Appendix A–2.

OTHER AREAS

The Bureau of the Census also collects and compiles statistics for other geographic entities which are not represented in this volume. Some of these are described below.

Congressional districts.—Congressional district boundaries are determined by State legislatures. The Congressional Apportionment Act of 1842 required every State populous enough to be entitled to more than one Representative to be divided by the State legislature into districts "composed of contiguous territory," each returning one member. While the districting requirement was omitted in the Apportionment Act of 1850, an act of 1862 revived the provisions of the original law of 1842. The Apportionment Act of 1872 continued the requirement of "contiguous territory" and added a provision that districts should contain "as nearly as practicable an equal number of inhabitants." The apportionment law of 1901 added the words "compact territory" to the previous requirement.

The number of Members in the House of Representatives is fixed by the Congress at the time of each apportionment. Between 1912 and 1959, the number of Representatives remained constant at 435. In 1959 the number was increased temporarily to 437 as a result of the admission of Alaska and Hawaii to the Union, each receiving 1 Representative.

Central business districts and major retail centers.—The primary objective of delineating "central business districts" (CBD's) is to provide a basis for comparing changes in business activity in the central business district with those in the remainder of the metropolitan area or of the central city. The delineation was accomplished by the Bureau of the Census with the cooperation of the Census Tract Committees representing a variety of local interests.

There are no universally accepted rules for determining what a CBD area should comprise. Therefore the Census Bureau, instead of providing rigid specifications for defining the CBD, provided a general characterization only. The Bureau described it as an area of very high land valuation, an area characterized by a high concentration of retail businesses, offices, theaters, hotels, and "service" businesses, and an area of high traffic flow; and required that the CBD ordinarily should be defined to follow existing tract lines, i.e., to consist of one or more whole census tracts (see below).

CBD's have been delineated only in those cities of 100,000 inhabitants or more (according to the 1950 Census of Population or a subsequent special census prior to 1959) in which there was a local Census Tract Committee recommendation for such an area.

Major retail centers (MRC's) were defined by the Bureau of the Census as those concentrations of retail stores (located inside the standard metropolitan statistical areas in which the CBD cities are located but outside of the CBD's themselves) which include a major general merchandise store—usually a department store. MRC's include not only the planned suburban

---

[6] An enumeration district (ED) is a small area assigned to an enumerator which must be canvassed and reported separately. In most cases, an ED contained approximately 250 housing units.

DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS shopping center but also the older string street and neighborhood developments which meet the above prerequisites.

Data on establishments, sales or receipts, and payroll for retail trade, hotels, and theaters for the CBD's and MRC's of each of selected large cities are shown in *U.S. Census of Business: 1958*, Vol. VII, *Central Business District Reports*.

Census tracts.—Census tracts are small areas into which large cities and their adjacent areas have been divided for statistical purposes. Tract boundaries were established cooperatively by a local committee and the Bureau of the Census, and were generally designed to achieve some uniformity of population characteristics, economic status, and living conditions. Initially, the average tract had about 4,000 residents. Tract boundaries were established with the intention of being maintained over a long time so that comparisons may be made from census to census.

1960 population and housing data were published for tracts in 180 areas in the United States and the Commonwealth of Puerto Rico; these areas contain more than 23,000 tracts. Of the 180 areas, all but 2 were standard metropolitan statistical areas and 136 were completely tracted.

For a discussion of census tract data and their uses, see Bureau of the Census, *Census Tract Manual*, Fourth Edition, 1958. Population and housing statistics for each tracted area are published in Bureau of the Census, *U.S. Censuses of Population and Housing: 1960, Census Tracts*, Final Reports PHC(1)—1 to 180. In addition, photocopies of tabulated but unpublished 1960 census data for census tracts can also be provided at cost by the Bureau of the Census.

City blocks.—According to Bureau of the Census usage, a city block is usually a well-defined rectangular piece of land bounded by streets or roads. It may, however, be irregular in shape or bounded by railroad tracks, streams, or other features. 1960 housing census data by blocks are available for 421 cities or urban places which had a population of 50,000 or more. These data and identifying maps are presented in *U.S. Census of Housing: 1960*, Vol. III, *City Blocks*, Series HC(3).

Census county divisions.—For purposes of presenting census statistics, counties in 18 States have been subdivided by the Bureau of the Census into statistical areas called "census county divisions" (CCD's). These divisions are used instead of the election precincts, townships, or other minor civil divisions (see below) for which census statistics were previously reported because the boundaries of such minor civil divisions changed frequently or were indefinite.

CCD's were established in the State of Washington for use in the 1950 Census. Between 1950 and 1960 they were established in 17 additional States, of which 10 are in the West—Arizona, California, Colorado, Hawaii, Idaho, Montana, New Mexico, Oregon, Utah, and Wyoming—and 7 in the South—Alabama, Florida, Georgia, Kentucky, South Carolina, Tennessee, and Texas.

CCD boundaries normally follow physical features such as roads, highways, trails, railroads, power lines, streams, and ridges. Larger incorporated places are recognized as separate divisions, even though their boundaries may change as the result of annexations. Cities with 10,000 inhabitants or more generally are separate divisions. In addition, some incorporated places with as few as 2,500 inhabitants may be separate divisions. An unincorporated enclave within a city is included in the same CCD as the city.

In areas with census tracts (see above) each CCD is a census tract or group of tracts, or the combination of two CCD's represents one census tract.

The boundaries of CCD's were reviewed with officials in each county and various State agencies and were approved by the governors (or their representatives) of the States. A separate report for each CCD State which presents a description of the boundaries is now in preparation. It will be issued shortly by the Bureau of the Census as *U.S. Censuses of Population and Housing: 1960, Census County Division Boundary Descriptions*, PHC(3). The population of each county, by census county divisions, is shown in *U.S. Census of Population: 1960*, Vol. I, *Characteristics of the Population*, Part A, "Number of Inhabitants."

Minor civil divisions.—These component parts of counties have been used traditionally for the presentation of statistics. They represent political or administrative subdivisions of the States and may be townships, precincts, districts, independent municipalities, etc. In a number of States, however, these areas are unsatisfactory as a basis for compiling local statistics. The Bureau of the Census has, therefore, instituted a program of defining and presenting statistics for areas within counties, designated as census county divisions (see above).

In addition to the 6,558 census county divisions, a total of 31,309 minor civil divisions was recognized in the 1960 Census of Population. Of these latter, 4,494 were independent municipalities and the remainder were towns in the New England States, New York, and Wisconsin, and townships in other States. For population figures, numbers, types, and maps of the minor civil divisions in each State, see *U.S. Census of Population: 1960*, Vol. I, Part A, cited above.

GEOGRAPHIC CODES

Codes for a number of areas are presented in the 3 columns preceding the stub of the first items for tables 2, 5, and 6; also 1 column preceding the stub of tables 3 and 4. They facilitate cross reference among the statistics for States, standard metropolitan statistical areas, counties, and cities, and identify each State economic area and its components.

The State code is a numbering in sequence of the alphabetical arrangement of the States, including the District of Columbia: Alabama, 01, to Wyoming, 51.

The standard metropolitan statistical area code is a similar numbering of the 212 SMSA's arranged alphabetically by name of area: Abilene (Tex.) area, 001, to Youngstown-Warren (Ohio) area, 212.

Within each State, the counties are numbered in alphabetical order beginning with 001. The county code, when prefixed by the State code, distinguishes each county in the United States.

The State economic area code consists of two parts (as 12–A, or 12–3). The first two digits are the code for the State in which the area is located; the second component is the State economic area code, as such, with a capital letter identifying a metropolitan State economic area, and an Arabic numeral indicating a nonmetropolitan area. Within each State, the State economic areas have been coded in a sequence which places together areas having the same general characteristics or possessing some major trait in common.

Source Notes and Explanations

Tables 1, 2, and 3

POPULATION AND AREA, 1960

Items 1–49 (except Items 16–20). General note.

The population statistics presented here are based upon results of the 1960 Census of Population conducted by the Bureau of the Census as of April 1, 1960. The major portion of the information compiled from this census appears in Volume I, *Characteristics of the Population.* This volume consists of Parts 1 to 57—one for the United States, each of the 50 States, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, and Canal Zone—and Part A, *Number of Inhabitants.*

For a detailed listing of published and unpublished data available, see Bureau of the Census, *U.S. Census of Population: 1960—Availability of Published and Unpublished Data*, 1961.

Data on the number of inhabitants and the basic demographic characteristics of age, sex, race, relationship to head of household, and marital status were obtained by enumeration of the *total* population. All other census data were obtained from a *sample* consisting of the members of every fourth household and of every fourth person who was not a member of a household but was living in "group quarters." A "household," according to present usage of the Census Bureau, comprises all persons who occupy a "housing unit," which is defined as a house, an apartment or other group of rooms, or a single room that constitutes "separate living quarters" (see text for Items 50–51). A household includes the "related persons" (the head of the household and others related to the head) and also the lodgers and employees, if any, who regularly live in the unit. A person living alone, or a group of unrelated persons sharing the same housing unit as partners, are also considered as households.

For a measure of the sampling variability of the sample data and for comment regarding reliability of all the data, see the section on "Accuracy of the Data" in Volume I, cited above.

Item 1. Land area.

Source: Bureau of the Census, *U.S. Census of Population: 1960*, Vol. I, *Characteristics of the Population.*

The land area includes (a) dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; (b) all streams, sloughs, estuaries, and canals that are less than one-eighth of a statute mile in width; and (c) all lakes, reservoirs, and ponds that are less than 40 acres in area.

A complete remeasurement of the area of the United States was made in 1940 for the 1940 Census of Population (see Bureau of the Census, *Areas of the United States, 1940*, 1942). Subsequently, for the 1950 and 1960 Censuses of Population, adjustments were made in area figures for counties and urban places in accord with the boundary changes which occurred between 1940 and 1960.

Items 2–3. Population rank and total.

Source: Same as Item 1.

Rank numbers were assigned on the basis of population size, with each area placed in descending order, greatest to smallest. Where ties occurred—two areas or more with identical populations—the same rank was assigned to the tied areas.

Each person enumerated in the census was counted as an inhabitant of his usual place of residence, which is generally construed to mean the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile. In the vast majority of cases, however, the use of these different bases of classification would produce substantially the same statistics, although there might be appreciable differences for a few areas.

Persons who were in the Armed Forces and quartered on military installations were enumerated as residents of the States and counties in which their installations were located. Members of their families were enumerated where they actually resided. College students were considered residents of the communities in which they were residing while attending college. The crews of vessels of the U.S. Navy and the U.S. merchant marine in harbors of the United States were counted as part of the population of the ports in which their vessels were berthed on April 1, 1960. Inmates of institutions, who ordinarily live in the institutions for long periods of time, were counted as inhabitants of the place in which the institution was located. Patients in general hospitals, who ordinarily remain in the hospital for short periods of time, were counted at, or allocated to, their homes. Persons without a usual place of residence were counted where they were enumerated.

Americans who were overseas for an extended period (in the Armed Forces, working at civilian jobs, study in foreign universities, etc.) are not included in the population of any of the States or of the District of Columbia. Persons temporarily abroad on vacations, business trips, and the like, were enumerated at their usual residences on the basis of information received from members of their families or from neighbors.

Item 4. Population per square mile.

Source: Same as Item 1.

The population per square mile is the average number of inhabitants per square mile of land area (Item 1).

See general note for Items 1–49.

Item 5. Population increase or decrease, 1950 to 1960.

Source: Same as Item 1.

The 1950 figures used as a base to compute the percentage increase or decrease for standard metropolitan statistical areas apply to the areas as defined in 1960. For other areas, the 1950 figures apply to area boundaries existing in 1950.

See text for Items 2–3.

Items 6–7. Urban residence and rural-farm residence.

Source: Same as Item 1.

The urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and which have either 25,000 inhabitants or more, or a population of 2,500 to 25,000, and a density of 1,500 persons or more per square mile; (d) counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more.

The population not classified as urban constitutes the rural population. The rural-farm population consists of the rural population living on farms, defined as places of 10 acres or more from which sales of farm products amounted to $50 or more in 1959, or places of less than 10 acres from which sales of farm products amounted to $250 or more in 1959.

See general note for Items 1–49 and text for Item 137.

Item 8. Population living in group quarters.

Source: Same as Item 1.

All persons who are not members of households are regarded as living in group quarters. Group quarters are living arrangements for institutional inmates or for groups of 5 persons or more unrelated to the person in charge and whose quarters are not defined as housing units. They are found most frequently in institutions, lodging and boarding houses, military and other types of barracks, college dormitories, fraternity and sorority houses, hospitals, homes for nurses, convents, monasteries, residences for clergy, and ships and other vessels. Group quarters are also located in a house or an apartment in which the living quarters are shared by the person in charge and 5 persons or more unrelated to him.

See general note for Items 1–49.

Item 9. Nonwhite population.

Source: Same as Item 1.

The nonwhite population consists of Negroes, Indians, Japanese, Chinese, Filipinos, Koreans, Asian Indians, Malayans, and other persons of nonwhite stock. Persons of Mexican birth or descent who are not definitely of Indian or other nonwhite descent are classified as white.

See general note for Items 1–49.

Items 10–13. Population by age.

Source: Same as Item 1.

Age classification is based on the age of the person in years as of April 1, 1960.

The median age is that age which divides the population into two equal parts, one-half of the cases falling below this age and one-half exceeding this age.

See general note for Items 1–49.

Items 14–15. Nativity of population.

Source: Same as Item 1.

The foreign-born population comprises all persons residing in the United States who are not classified as native. The native population includes all persons born in the United States, in the Commonwealth of Puerto Rico, or in a possession of the United States, and a small number of persons who were born in a foreign country or at sea and have at least one native American parent.

The population identified as native of foreign or mixed parentage comprises native persons, one or both of whose parents are foreign born.

See general note for Items 1–49.

PRESIDENTIAL VOTE, 1960

Items 16–17. Vote cast for President and percent for leading party.

Source: Governmental Affairs Institute, *America Votes, IV*, University of Pittsburgh Press, 1962.

The minimum age for voting is 21 years in all States except: Alaska, 19 years; Georgia, 18 years; Hawaii, 20 years; and Kentucky, 18 years.

In some areas, neither the Democratic nor the Republican Party received a plurality of votes cast. For such areas, the figures for Item 17 represent only the percent of the total vote cast for the Democratic or the Republican Party, whichever was greater.

VITAL STATISTICS

Items 18–19. Live births, 1960, and deaths, 1959.

Source: Department of Health, Education, and Welfare, Public Health Service, records (for Item 18), and *Vital Statistics of the United States, 1959*, Vol. II (for Item 19).

These figures are based on information contained in the original certificates filed in the State and, in some cases, city bureaus of vital statistics. They represent registered occurrences only, and cover only births and deaths occurring within the reporting areas. Deaths of, and births to, American nationals that occurred in other parts of the world are excluded. Births to, and deaths of, foreign nationals occurring within the United States, however, are included.

All data shown here are classified by place of residence except that data for Hawaii are classified by place of occurrence. For births, "place" means the mother's usual place of residence; for deaths, it means the usual place of residence of the deceased person prior to death.

All deaths which occur in institutions of all types are allocated to the reported place of *prior* residence, regardless of the length of time spent in the institution by the deceased prior to death.

Item 20. Marriages, 1960.

Source: Department of Health, Education, and Welfare, Public Health Service, records.

For 45 States, except for a few counties in Texas and New Mexico, the figures represent marriages performed. For those counties, for counties in Colorado, North Carolina, and Washington, and for the District of Columbia, the figures are based on marriage licenses issued. For Kentucky and Massachusetts, no data are available.

All figures are classified by place of occurrence.

FAMILIES AND INCOME

Item 21. Families, 1960.

Source: Same as Item 1.

A family consists of two or more persons living in the same household and related to one another by blood, marriage, or adoption; all persons living in one household and related to one another are regarded as one family. Not all households contain families, because a household may be composed of a group of unrelated persons or of one person living alone. A few households contain more than one family; for example, two family groups in the same household with no member of one family related to any member of the other family.

See also general note for Items 1–49.

Items 22–24. Income in 1959 of families, 1960.

Source: Same as Item 1.

Income is the sum of money received in 1959 from the following sources: Wages or salary; net income or loss from self-employment; net income or loss from rents, or receipts from roomers or boarders; royalties; interest, dividends, and periodic income from estates, trust funds, and annuities; social security benefits; pensions; veterans' payments, Armed Forces allotments for dependents, unemployment insurance, and public assistance or other governmental payments; and contributions for support from persons who are not members of the household, such as alimony. The figures represent the amount of income received before deductions for personal income taxes, social security, bond purchases, union dues, etc.

Family income represents, as a single amount, the combined income of the head of the family and all other members of the family 14 years old and over. Although the time period covered by the income statistics is the calendar year 1959, the composition of families relates to April 1960. Thus, on the one hand, family income does not include amounts received by persons who were members of the family during all or part of the calendar year 1959 if these persons no longer resided with the family in April 1960. On the other hand, family income includes amounts reported by related persons who did not reside with the family during 1959 but who were members of the family in April 1960.

Family *median* income is the amount of income which divides the distribution of families into two equal groups—one having incomes above the median and the other having incomes below the median.

Item 25. Aggregate income in 1959 of the population.

Source: Same as Item 1.

Aggregate income is the amount received by all income recipients 14 years old and over from all income sources (see text for Items 22–24). It was obtained by multiplying the *mean* income by the number of income recipients.

EDUCATION, 1960

Items 26–28. School years completed by the population 25 years old and over.

Source: Same as Item 1.

Data refer to the highest grade (or year) of regular school completed. Regular school refers to formal education of the type mentioned below for Items 29–31. Approximate equivalent grades were used for persons whose highest grade of attendance was in a foreign school system, whose highest level of schooling was measured by "readers," or whose training by a tutor was regarded as qualifying under the definition for regular schools.

The median number of school years completed is the value which divides the population group into two equal parts—one-half having completed more, and the other half less, schooling than the median.

See general note for Items 1–49.

Items 29–31. School enrollment of persons 5 to 34 years old.

Source: Same as Item 1.

The data include persons reported as attending or enrolled in a regular school or college at any time between February 1, 1960, and the date of census enumeration. Regular schooling is schooling that may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional degree. Schooling generally regarded as not regular includes schooling given in nursery schools; in specialized vocational, trade, or business schools; in on-the-job training; and through correspondence courses. Schooling not obtained in a regular school and schooling from a tutor or through correspondence courses are included only if the credits obtained were regarded as transferable to a school in the regular school system.

As defined here, elementary school includes grades 1 through 8; high school includes grades 9 through 12; and college includes junior or community colleges, regular 4-year colleges, and graduate or professional schools.

See general note for Items 1–49.

MIGRATION, 1960

Item 32. Migrants from different county.

Source: Same as Item 1.

The figures refer to all persons, 5 years old and over, who, on April 1, 1960, were reported as living in a county different from the one in which they lived on April 1, 1955; they do not include persons who, during the 5-year period, moved out of a particular county but who, by April 1, 1960, had moved back into it.

See general note for Items 1–49.

Item 33. Net gain or loss through civilian migration, 1950–1960.

Source: Bureau of the Census, records.

Net civilian migration represents the difference between the number of civilians migrating into a particular area and the number leaving the area to establish a residence elsewhere. A positive figure indicates net migration *into* the area; a negative figure indicates net migration *away* from the area.

Estimates of net civilian migration are derived by subtracting the difference between natural increase (the difference between births and deaths) and net movement of civilians into the Armed Forces from civilian population change during the decade. Civilian population change is the difference between the civilian population of the area in 1950 and 1960. The birth and death figures used to compute natural increase are based on the published vital statistics of the Public Health Service and include corrections for underregistration. Data on the net movement of civilians into the Armed Forces have been estimated on the basis of Department of Defense records. Estimates of net migration derived in this fashion incorporate whatever residual error arises from differences in net undercounts in the 1950 and 1960 Censuses, errors in estimating the completeness of registration of births and deaths, and errors in the statistics on the Armed Forces. Therefore, a small gain or loss or small differences between figures for different areas should be interpreted with caution.

CIVILIAN LABOR FORCE, 1960

Items 34–49. General note.

The civilian labor force comprises the employed and the unemployed components of the labor force, as described below. The total labor force includes members of the Armed Forces in addition to the civilian labor force.

The data on employment status relate to the calendar week prior to the date on which the persons provided the information. This week is not the same for all persons because not all were enumerated during the same week; the majority, however, were enumerated during the first half of April.

Employment data were obtained from persons in their own households and may differ from figures obtained from business establishments, farm enterprises, and certain governmental programs. Among the reasons for such differences are: (a) Information from the former (households) refers to place of residence, from the latter (business establishments, etc.) to place of work: (b) figures from the former represent an unduplicated count, from the latter they include more than once those persons who worked for more than one establishment during the reporting period; (c) the former covers all types of workers, the latter generally excludes private household workers, unpaid family workers, and self-employed workers; and (d) different industrial classification systems are normally used for the two types of data.

Employed persons comprise all civilians 14 years old and over who were either (a) "at work"—those who did any work for pay or profit, or worked without pay for 15 hours or more on a family farm or in a family business; or (b) "with a job but not at work"—those who did not work, were not looking for work, and had a job or business from which they were temporarily absent because of bad weather, industrial dispute, vacation, illness, or other reasons.

Items 34–36. Total civilian labor force, percent unemployed, and percent male.

Source: Same as Item 1.

Persons are classified as unemployed if they were 14 years old and over and not "at work" but looking for work. A person was considered as looking for work if he actually tried to find work or if he had made efforts to find work within the 60 days prior to being enumerated and was awaiting the results of such efforts. Persons waiting to be called back to a job from which they had been laid off or furloughed were also counted as unemployed.

See also general note for Items 1–49 and Items 34–49.

Items 37–46. Employed persons by major industry.

Source: Same as Item 1.

The industrial classification system developed for the 1960 Census of Population consists of 150 categories. These categories were condensed to 40 industry groups, for which data are shown in the source publication. The industry groups included here represent selections and combinations of those in the source. The following listing broadly defines the content of each group. The numbers in parentheses after each group are code designations of the *Standard Industrial Classification Manual*[1] to which the groups and components may be related. The relationship is shown here for general information purposes only and does *not* imply complete comparability.

See general notes for Items 86–95, 98–110, 113–118, 120–126, and 129–132 for references to *SIC* coverage of specific industries.

Item 38. Agriculture (01, 02, 07, except 0713).—Includes farming and agricultural services; excludes forestry and fisheries. Includes persons employed on farms as truck drivers, mechanics, and bookkeepers, and persons engaged in agricultural activities other than strictly farm operation, such as crop dusting or spraying, cotton ginning, and landscape gardening.

Item 39. Construction (15–17).

Item 40. Manufacturing, durable goods.—Includes the following subgroups:

Furniture, and lumber and wood products (24, 25). Includes logging and sawmills.

Primary metal industries (33). Includes blast furnaces, steel works, and rolling mills.

Fabricated metal industries (19, except 194, and 34).

Machinery, except electrical (35). Includes tractors, and office and store machines.

Electrical machinery, equipment, and supplies (36).

Motor vehicles and motor vehicle equipment (371).

Transportation equipment, except motor vehicle (37, except 371). Includes ship and boat repairing.

Other durable goods (194, 32, 38, 39).

Item 41. Manufacturing, nondurable goods.—Includes the following subgroups:

Food and kindred products (0713, 20). Includes grain mill products, confectionery, beverages, and canning and preserving.

Textile mill products (22). Includes carpets, knit goods, and dyeing and finishing of textiles.

Apparel and other fabricated textile products (23).

Printing, publishing, and allied industries (27).

Chemicals and allied products (28). Includes synthetic fibers, drugs, medicines, and paints.

Other nondurable goods (21, 26, 29–31).

Item 42. Transportation, communication, and other public utilities.—Includes the following subgroups:

Railroads and railway express service (40).

Trucking service and warehousing (42).

Other transportation (41, 44–47).

Communications (48). Includes telephone and telegraph, both wire and radio, and television.

Utilities and sanitary services (49). Includes electric, gas, steam, and water supply.

Item 43. Wholesale and retail trade.—Includes the following subgroups:

Wholesale trade (50).

Food and dairy products stores, and milk retailing (54).

Eating and drinking places (58).

Other retail trade (52, 53, 55–57, 59).

Item 44. Finance, insurance, and real estate (60–67).—Includes banks, credit agencies, and investment companies.

Item 45. Educational services (82, 84).—Includes both government and private.

Item 46. Public administration (91–94).—Includes postal service, and Federal, State, and local public administration. Includes only activities which are uniquely governmental functions, such as legislative and judicial activities and most of the activities in the executive agencies. Government agencies engaged in educational services and in other activities commonly carried on also by private enterprises, such as transportation and manufacturing, are classified in the appropriate industrial category. For example, school teachers are classified in the educational services category regardless of whether they are paid from private or public funds.

For detailed information on the 1960 Census industrial classification system, see Bureau of the Census, *1960 Census of Population, Classified Index of Occupations and Industries.*

See text for Items 34–36 and general note for Items 1–49 and Items 34–49.

Item 47. Employed persons in white-collar occupations.

Source: Same as Item 1.

Figures refer to employed persons in the following occupational groups:

a. Professional, technical, and kindred workers.
b. Managers, officials, and proprietors, except farm.
c. Clerical and kindred workers.
d. Sales workers.

For additional information on the composition of these groups, see source, and *1960 Census of Population, Classified Index of Occupations and Industries.*

See general note for Items 1–49 and Items 34–49.

Item 48. Employed persons working outside county of residence.

Source: Same as Item 1.

Figures refer to the county (or equivalent area) in which civilians at work during the week prior to census enumeration and Armed Forces personnel not on leave, sick, etc., carried out their occupational or job activities.

Persons working at more than one job were asked to report on the job at which they worked the greatest number of hours during the census week. Salesmen, deliverymen, and others who work in several places each week were asked to name the place in which they began work each day, provided they reported to a central headquarters. In cases in which daily work was not begun at a central place each day, the person was asked to report the county in which he had worked the greatest number of hours during the previous week.

---

[1] Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual,* U.S. Government Printing Office, Washington 25, D.C., 1957.

See general note for Items 1–49 and Items 34–49.

Item 49. Employed persons using public transportation to work.

Source: Same as Item 1.

Figures refer to transportation used during the week prior to census enumeration by the civilian population at work and by Armed Forces personnel not on leave, sick, etc. Public transportation includes railroads, subways, elevated railways, buses, and streetcars. Persons using more than one means of transportation in daily travel were classified according to the "principal means" used, that is, the means covering the greatest distance, or the means most frequently used if different means were used on different days.

See general note for Items 1–49 and Items 34–49.

HOUSING, 1960

Items 50–72. General note.

The housing statistics presented here are based upon results of the 1960 Census of Housing conducted by the Bureau of the Census as of April 1, 1960. The major portion of the information compiled from this census for geographic areas appears in *U.S. Census of Housing: 1960*, Vol. I, *States and Small Areas.* This volume consists of 55 parts—one for the United States, each of the 50 States, the District of Columbia, Puerto Rico, Guam, and Virgin Islands.

For a detailed listing of published and unpublished data available, see Bureau of the Census, *U.S. Census of Housing: 1960—Availability of Published and Unpublished Data*, 1961.

Although some information in the census was collected for all housing units, information for most of the items was collected for samples of housing units. Sample items were based on 5, 20, or 25 percent of the housing units. For items enumerated for all housing units, moreover, the original tabulations were not always based on the complete count; data for some of these items were tabulated for a sample of units, particularly for areas with large population. For a measure of the sampling variability and for a more comprehensive discussion relative to the sampling data, see the text on "Sample Design and Sampling Variability" in the source publication.

Medians and percentages are not shown where the base (e.g., all housing units or number of occupied units) is smaller than a required minimum. For items tabulated on a complete count basis, they are not shown if the base is less than 50 housing units; for items tabulated on a sample basis, they are not shown if the base, after inflation, is less than 200 units.

In the 1960 Census, living quarters were enumerated as housing units or as group quarters. A housing unit is a house, an apartment or other group of rooms, or a single room which is occupied or intended for occupancy as separate living quarters; that is, the occupants do not live and eat with any other persons in the structure, and there is either (a) direct access from the outside or through a common hall, or (b) a kitchen or cooking equipment for the exclusive use of the occupants. Trailers, tents, boats, and railroad cars were included if they were occupied as living quarters; they were excluded if they were vacant or used only for extra sleeping space, vacations, or business. Also excluded were living quarters of the following types: Accommodations predominantly for transients; barracks for workers; living quarters in institutions, general hospitals, and military installations (except for housing units in buildings containing only family quarters for staff members).

For a definition of group quarters, see text for Item 8.

Items 50–51. Dwelling units, 1950, and housing units, 1960.

Source: Bureau of the Census, *U.S. Census of Housing: 1960*, Vol. I, *States and Small Areas.*

In the 1950 Census, the unit of enumeration was the dwelling unit. Although the definitions of "housing unit" in 1960 and "dwelling unit" in 1950 were essentially similar, the "housing unit" definition encompassed all private living quarters while the "dwelling unit" definition did not cover all private living accommodations.

The main difference between housing units and dwelling units is in the treatment of 1-room quarters. In 1960, separate living quarters consisting of one room with direct access but without separate cooking equipment qualified as a housing unit whether in an apartment house, roominghouse, or house converted to apartment use; in hotels, a single room qualified as a housing unit if occupied by a person whose usual residence was the hotel or by a person who had no usual residence elsewhere. In 1950, a 1-room unit without cooking equipment qualified as a dwelling unit only if it was located in a regular apartment house or if it constituted the only living quarters in the structure. In hotels, in 1950, occupied and vacant quarters were counted as dwelling units only if more than half the accommodations in the hotel were for permanent guests; if less than half, all quarters were excluded.

The change in definition between 1950 and 1960 had relatively little effect on comparability of the data for large areas. Any effect it may have had occurred in such smaller areas as census tracts and blocks for which no data are presented here.

See general note for Items 50–72.

Item 52. Median number of rooms per unit.

Source: Same as Items 50–51.

Rooms include whole rooms used for living purposes, such as living rooms, dining rooms, bedrooms, kitchens, finished attic or basement rooms, recreation rooms, lodgers' rooms, and rooms used for offices by a person living in the unit. Not considered as rooms are bathrooms; halls, foyers, or vestibules; closets; alcoves; pantries; strip or pullman kitchens; laundry or furnace rooms; unfinished attics, basements, and other space used for storage. Figures refer to all units, occupied and vacant.

See general note for Items 50–72.

Item 53. Units in 1-unit structures.

Source: Same as Items 50–51.

A 1-unit structure is a separate building that has either open space on all four sides or is separated from other structures by dividing walls that extend from ground to roof. Thus, a 1-unit structure may be a row house, a double house, or a house attached to a nonresidential structure. Figures refer to all units, occupied and vacant.

See general note for Items 50–72.

Item 54. Units in structures built in 1950 or later.

Source: Same as Items 50–51.

"Year built" refers to the date the original construction of the structure was completed, not to any later remodeling, addition, or conversion.

See general note for Items 50–72.

Item 55. Sound units with all plumbing facilities.

Source: Same as Items 50–51.

The census enumerator determined the condition of each housing unit by observation on the basis of specified criteria related to the extent or degree of visible defects. The application of these criteria necessarily involved some judgment on the part of the individual enumerator.

Sound housing is defined as housing with no defects or only slight defects which are normally corrected during the course of regular maintenance. Examples of slight defects are lack of paint; minor damage to porch or steps; small cracks in walls, plaster, or chimneys; and broken gutters or downspouts.

A housing unit with all plumbing facilities is one which has hot and cold running water inside the structure, and flush toilet and bathtub (or shower) inside the structure for the exclusive use of the occupants.

The two other broad classifications of conditions used in the census are deteriorating housing and dilapidated housing. Deteriorating housing needs more repair than would be provided in the course of regular maintenance and has one or more defects of an intermediate nature that must be corrected if the unit is to continue to provide safe and adequate shelter. Dilapidated housing does not provide safe and adequate shelter and endangers the health, safety, or well-being of the occupants. Data for these classes are not presented here.

See general note for Items 50–72.

Item 56. Occupied units.

Source: Same as Items 50–51.

A housing unit was defined as occupied if it was the usual place of residence for the person or group of persons living in it at the time of census enumeration. Included are units occupied by persons who were only temporarily absent and units occupied by persons with no usual place of residence elsewhere.

See general note for Items 50–72.

Item 57. Population per occupied unit.

Source: Same as Item 1.

This item was computed by dividing the population in housing units by the number of occupied units. Persons living in group quarters were not included.

See general note for Items 50–72.

Item 58. Occupied units with 1.01 or more persons per room.

Source: Same as Items 50–51.

The number of persons per room was computed for each occupied housing unit by dividing the number of persons by the number of rooms in the unit.

All persons enumerated in the 1960 Census of Population as members of the household were counted in determining the number of persons who occupied the housing unit. This number includes not only occupants related to the head but also any lodgers, foster children, wards, and resident employees who shared the living quarters of the household head.

See general note for Items 50–72 and text for Item 52.

Item 59. Occupied units with occupants who moved into unit during 1958 to 1960.

Source: Same as Items 50–51.

Figures are based on "year moved" (year of latest move) information reported for the head of the household. Although this information is usually identical for the remainder of the household, it may differ in some cases.

See general note for Items 50–72.

Items 60–61. Owner-occupied units and median value.

Source: Same as Items 50–51.

A housing unit is owner occupied if the owner or coowner lives in it, even if it is mortgaged or not fully paid for. For definition of occupied units, see text for Item 56.

Value figures were based on the respondent's estimate of the sales value of the property (house and land) in April 1960. Value data are restricted to units having only one unit in the property and having no business establishment. Trailers, units on farms, and all units on places of 10 acres or more in rural territory were excluded.

The median value is the theoretical value which divides the distribution of units into two equal parts—one-half the units falling below this value and the other half exceeding it. In the tabulation of data on value, the lowest tabulation group used was "Less than $5,000." In cases where the median value falls into this group, a value of $5,000 followed by a minus sign is used.

Correspondingly, the highest tabulation group used for occupied units was "$35,000 or more." When the median value falls into this group, $35,000 followed by a plus sign is used.

See general note for Items 50–72.

Items 62–63. Renter-occupied units.

Source: Same as Items 50–51.

All occupied units which are not owner occupied are classified as renter occupied. For definition of occupied and owner-occupied units, see text for Item 56 and Items 60–61.

Gross rent is the contract rent plus the average monthly cost of utilities (water, electricity, gas) and fuels, such as wood, coal, and oil, if these items are paid for by the renter. In rural territory, rent data exclude rent for farm units.

The median rent is the theoretical rent which divides the distribution into two equal parts—one-half the cases falling below this rent and the other half exceeding it. Renter-occupied units for which no cash rent was paid were excluded from the computation of the median.

See general note for Items 50–72.

Items 64–65. Vacant units year-round available, total and percent for rent.

Source: Same as Items 50–51.

Available vacant units are vacant units which are on the market for year-round occupancy, in either sound or deteriorating condition, and being offered for rent or for sale. The item "for rent" includes units being offered only for rent and those being offered for rent or sale at the same time.

See text for Item 55 and general note for Items 50–72.

Items 66–72. Occupied units with selected equipment and automobiles.

Source: Same as Items 50–51.

Housing units were considered as having a clothes washing machine (power-operated) if a member of a household reported owning one, whether the machine was located in the unit or elsewhere on the property. Units not included were those for which occupants reported machines used but not owned by members of the household, such as machines provided by the management of an apartment building.

A home food freezer is defined as an appliance, separate from the refrigerator, which freezes food and keeps food frozen. The freezer must be located in the housing unit or elsewhere on the property. Excluded is a freezer combined in the same cabinet with a refrigerator, even if it has a separate door.

Air conditioning is defined as the cooling of air by refrigerating apparatus. Excluded are evaporative coolers and fans or blowers not connected to a refrigerating apparatus.

Units were considered as having a television set if the household was in possession of a set in working order or being repaired.

Units were considered as having a telephone if a telephone was available to the occupants, whether located inside or outside the unit or serving the occupants of several units. Figures for units with telephones, therefore, do not indicate the number of subscribers or the number of telephones in homes.

Automobiles available to a housing unit represent passenger automobiles, including station wagons, owned or regularly used or ordinarily kept at home, such as some company cars, by any of the occupants of the unit. Taxicabs, pickups or larger trucks, and dismantled or dilapidated cars in an early stage of being junked were not included.

See general note for Items 50–72.

BANKING, 1960

Items 73–75. Bank deposits.

Source: Board of Governors of the Federal Reserve System, *Distribution of Bank Deposits by Counties and Standard Metropolitan Areas, June 15, 1960*.

Figures are as of June 15. Total deposits cover all banks (commercial and mutual savings). In addition to the demand and time deposits shown here, they include interbank and governmental deposits. Demand and time deposits cover only deposits of individuals, partnerships, and corporations. Time deposits consist principally of savings deposits of individuals, subject to 30 days notice, and of other deposits which may not be withdrawn in less than 30 days. Deposits of branches located outside the county or area of the head office of a bank are included with figures for the counties or areas in which the branches are located.

Items 76–77. Savings and loan associations: Savings capital and first mortgage loans outstanding.

Source: Federal Home Loan Bank Board, records.

Figures are as of December 31 and are for savings and loan association members of the Federal Home Loan Bank System, a credit reserve system for home financing institutions. These institutions are also known sectionally as cooperative banks or building and loan or homestead associations. As of December 31, 1960, there were 6,320 savings and loan associations of which 4,694, or 74 percent, were member associations of the FHL Bank System. Aggregate resources of members amounted to 69.3 billion dollars, or 97 percent, of the total resources (71.5 billion dollars) of all associations. Member associations include 1,873 Federally chartered savings and loan associations (resources 38.5 billion dollars) and 2,821 State-chartered associations (resources 30.8 billion dollars).

Savings capital figures represent the savings and investments of the public in the member associations. First mortgage loans outstanding represent the unpaid balance of first mortgages, primarily on homes, held by member associations.

LOCAL GOVERNMENTS, 1957

Items 78–82. General note.

Local governments statistics are based upon results of the 1957 Census of Governments conducted by the Bureau of the Census. For each county, the financial data comprise amounts for all local governments—not only the county government but also any municipalities, townships, school districts, and special districts within the county. To avoid duplication, revenue and expenditure figures are net of reported transactions among local governments.

Revenue and expenditure items include, respectively, all amounts of money received and paid out by a government and its agencies (net of correcting transactions such as recoveries or refunds), with the exception of amounts for debt issuance and retirement and for loan and investment, agency, and private trust transactions.

Payments among the various funds and agencies of a particular government are excluded from revenue and expenditure as representing internal transfers. Thus, a government's contribution to a retirement fund which it administers is not counted as expenditure; and the receipt of this contribution by the retirement fund is not counted as revenue.

Governmental expenditure includes all capital outlay, of which a major portion is commonly financed by borrowing. Receipts from borrowing, however, are not included as governmental revenue. Thus, the relationship between the revenue and expenditure figures shown here should not be considered a direct measure of the degree of budgetary "balance," as that term is usually applied.

Items 78–79. General revenue.

Source: Bureau of the Census, *U.S. Census of Governments: 1957*, Vol. VI, Nos. 1–48.

General revenue includes all revenue except utility, liquor stores, and insurance trust revenue. All tax collections and intergovernmental revenue, even if designated for insurance trust or local utility purposes, are classified as general revenue. Property taxes are taxes conditioned on ownership of property and measured by its value.

See general note for Items 78–82.

Items 80–81. General expenditure.

Source: Same as Items 78–79.

General expenditure includes all expenditures of a government except utility, liquor stores, and insurance trust expenditures.

Local government expenditures for education mainly involves provisions of elementary and high schools but also includes colleges and other educational institutions, when these are operated by local governments.

See general note for Items 78–82.

Item 82. Debt outstanding.

Source: Same as Items 78–79.

Debt outstanding includes all long-term credit obligations of the government and its agencies, whether backed by full-faith and credit (implying the power of taxation) or nonguaranteed, and all interest-bearing short-term (that is, repayable within one year) credit obligations. It includes judgments, mortgages, and "revenue" bonds, as well as general obligation bonds, notes, and interest-bearing warrants. It excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from other governments, and rights of individuals to benefits from employee-retirement or other social insurance funds.

BUSINESS UNITS UNDER SOCIAL SECURITY, FIRST QUARTER, 1959

Items 83–85. Employers and employment covered by Social Security.

Source: Bureau of the Census and Bureau of Old-Age and Survivors Insurance, cooperative report, *County Business Patterns, First Quarter 1959*, Part I, *U.S. Summary*.

These figures are derived from administrative reports for old-age, survivors, and disability insurance (OASDI) coordinated with reports of the Censuses of Business, Manufactures, and Mineral Industries, and a special survey of multiunit companies conducted by the Census Bureau.

The data comprise (a) all OASDI-covered wage and salary employment of nonfarm industrial and commercial employers and nonprofit membership organizations (operated for the promotion of the interests of their members) and (b) all employment of religious, charitable, educational, and other nonprofit organizations voluntarily covered under the elective provisions of the Federal Insurance Contributions Act. The figures exclude: Farm workers, domestic workers, members of the Armed Forces, all Federal civilian employees not covered and most of those covered under a Federal retirement system, employees of State and local governments, railroad employment subject to Railroad Retirement Act, employees on oceanborne vessels, and self-employed persons.

Since the county coding system used by the Bureau of Old-Age and Survivors Insurance for tabulating data provides for a maximum of 99 counties in any one State, combinations of figures for two or more contiguous counties were required in the following States: Georgia, Illinois, Kansas, Kentucky, Missouri, North Carolina, Texas, and Virginia. The five boroughs of New York City are combined into one group. The independent cities of Baltimore, Md., and St. Louis, Mo., are treated as separate counties. In Virginia, independent cities, except Hampton and Newport News, are combined with the counties from which they originated. Los Alamos and Sandoval Counties in New Mexico are combined into 1 group.

The sum of the county figures for a particular State usually does not equal the State total shown because "Statewide" reporting units are included in the State totals. "Statewide" reporting units are those without a fixed location within the State, or with a significant number of employees in more than one county, or of unknown county locations. This incomplete county detail causes only slight understatement of county employment.

A reporting unit is, generally, a single establishment or a group of similar establishments operated by one employer. Nonmanufacturing establishments of an employer are grouped into a single reporting unit if they are in the same county and engaged in the same kind of business. For manufacturing industries, reporting establishments represent single establishments.

Figures for Item 84 represent the number of employees during the pay period ending nearest March 15, 1959. These figures were obtained from the employer's tax return and, in those cases where they were incompletely or improperly reported, are corrected by estimates.

Figures for taxable payrolls, January–March, represent the amount of taxable wages paid for "covered employment" during the quarter. Under the law in effect in 1959, taxable wages for covered employment were all payments up to the first $4,800 paid to any one employee by any one employer during the year, including the cash value of payments in kind. In general, all payments for covered employment in the first quarter were taxable unless the employee was paid at the rate of more than $19,200 per year.

MANUFACTURES, 1958

Items 86–95. General note.

The 1958 Census of Manufactures covers all establishments primarily engaged in manufacturing, as defined in the 1957 edition of the *Standard Industrial Classification Manual.*[1] The *SIC Manual* defines manufacturing as the mechanical or chemical transformation of inorganic or organic substances into new products. The assembly of component parts of products is also considered to be manufacturing, if the resulting product is neither a structure nor other fixed improvement. These activities are usually carried on in plants, factories, or mills, which characteristically use power-driven machines and materials-handling equipment.

The 1957 edition of the *SIC Manual* represents a major change from the 1945 edition which was used for the 1954 Census of Manufactures. Among these changes are:

> a. Addition to the manufactures group of approximately 3,500 establishments primarily engaged in producing ready-mixed concrete (Industry Number 3273 as classified in the 1957 *SIC*) which employed approximately 59,000 employees and were formerly classified in the wholesale and retail trade groups; and an intermediate large number of machine shops solely engaged in repair work, formerly classified with service trades group, and merged with "machinery and parts, except electrical, not elsewhere classified" (Industry Number 3599).
>
> b. Transfer from the manufactures group to the service trades group of establishments primarily engaged in retreading or rebuilding tires. Neither the number of establishments nor the number of employees affected by this change are presently known.

For additional information on changes in scope and classification of certain industries within the manufactures group, see Bureau of the Census, *U.S. Census of Manufactures: 1958*, Vol. II, *Industry Statistics*, Parts 1 and 2.

The Census of Manufactures is conducted on an establishment basis. Thus, a company operating establishments at more than one location is required to submit a report for each location. In addition, companies engaged in distinctly different lines of activity at one location are required to submit separate reports, provided the plant records permit such a separation and provided the activities are substantial in size. Census tabulations of establishment reports, therefore, differ from tabulations prepared on a company basis, i.e., from consolidated reports which combine activities at different locations. Reports were required from all establishments employing one or more persons at any time during 1958. Figures exclude statistics for separate central administrative offices and auxiliary units of multi-establishment companies.

Items 86–88. Manufacturing establishments, by employment size-class.

Source: Bureau of the Census, *U.S. Census of Manufactures: 1958*, Vol. III, *Area Statistics*.

A manufacturing establishment is generally defined as a single physical location where industrial operations are performed; e.g., a factory, mill, or plant. An establishment is not necessarily identical with the business concern or firm, which may consist of one or more establishments. It is also to be distinguished from organizational subunits, departments, or divisions within an establishment.

The minimum size for including establishments is limited to establishments employing one or more persons at any time during the census year. This limitation has applied since 1947.

See general note for Items 86–95.

---

[1] Executive Office of the President, Bureau of the Budget, *Standard Industrial Classification Manual*, U.S. Government Printing Office, Washington 25, D.C., 1957.

Items 89–90. All employees, number and payroll.

Source: Same as Items 86–88.

Figures comprise all full-time and part-time employees on the payrolls of operating manufacturing establishments who worked or received pay for any part of the pay period ending nearest the 15th of 4 specified months (see below). Included are all persons on paid sick leave, paid holidays, and paid vacation during these pay periods. Excluded are members of the Armed Forces and pensioners on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Employee figures were reported separately for "production and related workers" and for "all other employees." Figures for the former were for midmonth employment in March, May, August, and November; for "all other employees," only for mid-March employment. Thus, the figures for Item 89 are an average of the 4 monthly figures for "production workers" plus the March figure for "all other employees."

Payroll includes the gross earnings paid in 1958 to all employees of operating manufacturing establishments. Included are all forms of compensation, such as salaries, wages, commissions, dismissal pay, bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' social security contributions, withholding taxes, group insurance, union dues, and savings bonds. Payroll also includes salaries of officers of an incorporated establishment. Excluded are payments on drawing accounts of proprietors or partners, payments to members of Armed Forces and pensioners on the active payroll, and employers' social security contributions or other nonpayroll labor costs.

Employment and payroll figures do not include central administrative offices and auxiliaries.

See general note for Items 86–95.

Items 91–93. Production workers, number, man-hours, and wages.

Source: Same as Items 86–88.

The number of production workers includes all production and related workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, and janitorial and watchman services; product development; auxiliary production for plants' own use (e.g., power plant); recordkeeping; and other services closely associated with production operations at the establishment covered by the report. Supervisory employees above the working foreman level are excluded.

Man-hours consist of all plant man-hours worked by production and related workers, including actual overtime hours. They exclude time spent on vacations, holidays, and sick leave whether or not an employee received pay for these periods. If an employee elected to work during his vacation period, only the hours actually worked were counted.

Wages represent all compensation paid to production workers.

See general note for items 86–95.

Item 94. Value added by manufacture, adjusted.

Source: Same as Items 86–88.

Unadjusted figures were first obtained by subtracting the cost of materials, supplies and containers, fuel, purchased electric energy, and contract work from the value of shipments (net selling values, f.o.b., plant) for products manufactured plus receipts for services rendered.

The resulting figures for 1958 were then adjusted by the addition of the following: (a) The difference between the sales price and cost of merchandise sold without further manufacture, processing, or assembly, and (b) the net change in finished products and work-in-process inventories between the beginning and the end of the year. In 1954, the value-added figures (Item 97) were not adjusted for these two aspects and are, therefore, referred to as "unadjusted."

See general note for Items 86–95.

Item 95. Capital expenditures, new.

Figures represent expenditures made during 1958 for permanent additions and major alterations to manufacturers' plants, as well as for new machinery and equipment purchases that were chargeable to fixed-asset accounts and were of a type for which depreciation accounts are ordinarily maintained. Expenditures for machinery and equipment include those made for replacement purposes, as well as for additions to plant capacity. Excluded are costs of maintenance and repairs charged as current operating expense, expenditures for land, and expenditures made by owners of plants and equipment leased to reporting manufacturers.

See general note for Items 86–95.

MANUFACTURES, 1954

Items 96–97. All employees and value added by manufacture, unadjusted.

Source: Same as Items 86–88.

For definition of concepts, see text for Items 86–88 and Item 94. See also general note for Items 86–95.

The county figures for some States do not add to the State totals shown. This apparent discrepancy is due partly to rounding and partly to the revision in 1958 of the 1954 State totals without corresponding changes in county figures, or to revision of county figures without corresponding changes in State totals. All such revisions were minor.

RETAIL TRADE, 1958

Items 98–110. General note.

Retail trade, as defined in the *Standard Industrial Classification Manual* (see references under general note, Items 86–95) and as covered in the 1958 Census of Business, includes establishments primarily engaged in selling merchandise to personal, household, and farm users. Retail liquor stores operated by State and local governments are also included although they are not classified as retail trade in the *SIC Manual.* The figures shown here exclude data on administrative offices, warehouses, and other auxiliary units which service retail establishments of the same organizations.

For the most part, establishments engaged in retail trade sell merchandise to the general public for personal or household consumption. Certain exceptions to this general rule are made necessary by trade practices. For example, retail lumber yards are included in retail trade despite the fact that a high proportion of their sales are made to contractors. Excluded from retail trade are places of business operated by institutions and open only to their own members or personnel, such as restaurants and bars operated by clubs, school cafeterias, and eating places operated by industrial and commercial enterprises for their own employees.

For purposes of coverage in the 1958 Census, retail establishments were divided into two categories: Those with some paid employment during 1958, and those with no paid employment. Information for establishments having paid employees was obtained by a mail canvass. Information for establishments with no paid employment was derived from 1958 Federal income tax returns. Establishments with no paid employment and a sales volume of less than $2,500 in 1958 were excluded.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1957 edition of the *SIC Manual.*

In all major respects, the 1954 and 1958 Censuses were conducted under similar conditions and procedures. However, strict comparability is affected by the combining in the 1958 Census of "leased departments" with the retail business in which located. Leased departments are businesses operated as departments of a retail business and not owned by the principal owner of the business establishment in which they are located. In 1954, these departments were counted as separate establishments.

For a discussion of other factors which affect strict comparability, see source publication.

Items 98–99. Retail establishments.

Source: Bureau of the Census, *U.S. Census of Business: 1958,* Vol. II, *Retail Trade, Area Statistics.*

The number of establishments represents a summary of reports for individual "establishments" rather than "companies." A separate report was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities were generally grouped together as a single establishment; the entire establishment was then classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities were conducted under the same ownership at a single location, and where conditions prescribed by the *SIC Manual* for recognizing the existence of more than one establishment were met, separate establishment reports were made for each of the different activities.

The number of establishments shown here is the number in business as of December 31, 1958.

See general note for Items 98–110.

Items 100–101. Sales of retail establishments.

Source: Same as Items 98–99.

Sales are defined to include the total of merchandise sold plus receipts from repairs and from other services to customers, whether or not payment was received in 1958. Sales are normally recorded net of deductions for refunds and allowances for merchandise returned by customers. Total sales exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include the amount of local and State sales taxes and Federal excise taxes collected by the store directly from customers and paid directly by the store to a local, State, or Federal taxing agency.

The sales figures represent total sales and receipts of all establishments primarily engaged in retail trade. They exclude retail sales made by manufacturers, wholesalers, service establishments, and other businesses whose primary activity is other than retail trade. They do, however, include receipts other than from the sale of merchandise at retail (e.g., service receipts, sales to industrial users, sales to other retailers, etc.).

Although the figures shown here for number of retail establishments represent the number in business at the end of the year, the sales figures include sales of all establishments in business at any time during the year.

See general note for Items 98–110.

Items 102–104. Retail trade payroll, paid employees, and active proprietors.

Source: Same as Items 98–99.

Payroll comprises all forms of compensation (salaries, wages, commissions, bonuses, and payments in kind) paid during the year to all employees. It includes amounts paid to officers and executives of corporations; it does not include compensation of proprietors or of partners of unincorporated businesses. Included in payroll are the value of payments in kind, such as free meals, lodgings, etc., but not amounts received by employees as tips, etc. Payroll is reported before deductions for social security, income tax, insurance dues, etc.

Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll during the workweek ending nearest November 15, 1958.

Active proprietors of unincorporated businesses comprise owners or partners who devoted the major portion of their time to the operation of the business.

See general note for Items 98–110.

Items 105–106. General merchandise group.

Source: Same as for Items 98–99.

This group includes stores usually selling a combination of two or more of the following kinds of merchandise: Dry goods, apparel and accessories, furniture and home furnishings, small wares, hardware, and food. Among the kinds of business included in this group are those commonly known as department stores, limited price variety stores (5-and-10, etc.), dry goods stores, sewing and needlework stores, and general stores.

See general note for Items 98–110 and text for Items 98–99 and 100–101.

Items 107–108. Food stores.

Source: Same as for Items 98–99.

This group comprises establishments primarily selling food for home preparation and consumption. Establishments primarily selling prepared foods and drinks for consumption on their own premises are classified as "eating and drinking places," and stores primarily engaged in selling packaged beers and liquors are classified separately as "liquor stores." Among the kinds of business included in this group are grocery stores, meat markets, fish markets, fruit stores and vegetable markets, candy stores, dairy products stores, retail bakeries, and egg and poultry dealers.

See general note for Items 98–110 and text for Items 98–99 and 100–101.

Items 109–110. Automotive dealers.

Source: Same as for Items 98–99.

This group includes establishments selling new automobiles or new and used automobiles and trucks, new automobile tires and other accessories, aircraft, boats, motorcycles, and household trailers. Establishments primarily selling trucks and motorized industrial equipment are classified as wholesale establishments and are excluded.

See general note for Items 98–110 and text for Items 98–99 and 100–101.

RETAIL TRADE, 1954

Items 111–112. Retail establishments and sales.

Source: Same as Items 98–99.

For explanatory notes, see text for Items 98–99 and 100–101. See also general note for Items 98–110. For some States, county figures do not add to State totals; see text for Items 96–97 for explanation.

WHOLESALE TRADE, 1958

Items 113–118. General note.

Wholesale trade, as defined in the 1957 edition of the *Standard Industrial Classification Manual* (see reference under general note, Items 86–95) and as covered in the 1958 Census of Business, includes establishments with one or more paid employees and primarily engaged in selling merchandise to retailers; to institutional, industrial, commercial, and professional users; or to other wholesalers; or in negotiating as agents in buying merchandise for, or selling merchandise to, such persons or companies. Importers selling merchandise at wholesale in the U.S. market, exporters, and wholesale liquor establishments operated by State governments are included. Statistics shown here exclude data for administrative offices, warehouses, and other auxiliary units which service wholesale establishments of the same organizations.

In all major respects, the 1954 and 1958 Censuses were conducted under similar conditions and procedures. For a discussion of several factors which affect strict comparability, see source publication.

Items 113–114. Establishments and sales.

Source: Bureau of the Census, *U.S. Census of Business: 1958*, Vol. IV, *Wholesale Trade, Area Statistics*.

See text for Items 98–99 and 100–101 for definitions of terms and classification procedures affecting establishments and sales.

Sales figures represent total sales and receipts of all establishments primarily engaged in wholesale trade. They exclude sales made by manufacturers, retailers, service establishments, and other businesses whose primary activity is other than wholesale trade. They do, however, include receipts other than those from sales of merchandise at wholesale (e.g., retail sales, service receipts, etc.) by establishments primarily engaged in wholesale trade.

Although the figures shown here for number of establishments represent the number in business at the end of the year, the sales figures include sales of all establishments in business at any time during the year.

See general note for Items 113–118.

Items 115–116. Payroll and paid employees.

Source: Same as Items 113–114.

See text for Items 102–104 for definitions of terms and general note for Items 113–118.

Items 117–118. Merchant wholesalers establishments and sales.

Source: Same as Items 113–114.

For explanatory notes, see text for Items 98–99, 100–101, and 113–114, and general note for Items 113–118.

This type of operation consists of establishments engaged in buying or selling merchandise on their own account, including farm products merchants who do not buy from farmers. Included are the following types of operation: Wholesale merchants and distributors, importers, exporters, rack merchandisers, terminal grain elevators, cash-carry wholesalers, wagon and truck distributors, and other limited-function wholesalers.

WHOLESALE TRADE, 1954

Item 119. Sales.

Source: Bureau of the Census, *U.S. Census of Business: 1954*, Vol. IV, *Wholesale Trade, Area Statistics*.

For definition of sales, see text for Items 113–114. See also general note for Items 113–118.

SELECTED SERVICES, 1958

Items 120–126. General note.

The 1958 Census of Business covered all establishments primarily engaged in selected service trades as defined in the 1957 edition of the *Standard Industrial Classification Manual* (see reference under general note, Items 86–95). The Service Division is defined to include establishments primarily rendering a wide variety of services to individuals and businesses. The *SIC Manual* includes 14 major groups in the Service Division of which 7 are included in the census, essentially in their entirety, as follows:

70. Hotels, roominghouses, camps, and other lodging places. The subordinate groups, "rooming and boarding houses" and "organization hotels and lodginghouses, on membership basis," are excluded.

72. Personal services.

73. Miscellaneous business services.

75. Automobile repair, automobile services, and garages.

76. Miscellaneous repair services.

78. Motion pictures.

79. Amusement and recreation services, except motion pictures. Symphony orchestras, ballet and opera companies, and similar services organized on a nonprofit basis are included. Establishments in Group 79 which are operated to provide recreational facilities for their own members and which are exempt from payment of Federal income tax under the provisions of Sec. 501 of the Internal Revenue Code are not included.

Excluded from coverage in the census are medical and other health services; legal services; education services; museums, art galleries, and botanical and zoological gardens; nonprofit membership organizations; private households; and miscellaneous services.

The figures shown here exclude data on administrative offices, warehouses, and other auxiliary units which service establishments of the same organization.

In all major respects, the 1954 and 1958 Censuses were conducted under similar conditions and procedures. For a discussion of several factors which affect strict comparability, see source publication.

Both the 1954 and 1958 Censuses excluded businesses with no paid employment which had receipts volume of less than $1,000 in the census year.

Items 120–123. Establishments and receipts.

Source: Bureau of the Census, *U.S. Census of Business: 1958*, Vol. VI, *Selected Services, Area Statistics*.

See text for Items 98–99 and 100–101 for definitions of terms and classification procedures affecting establishments and receipts and general note for Items 120–126.

Receipts represent the total receipts from customers for services rendered or merchandise sold in 1958. They include local and State sales taxes, amusement taxes, and Federal excise taxes collected directly from customers. They exclude service receipts of retailers, wholesalers, manufacturers, and other businesses whose primary activity is other than in the selected services segment. They do, however, include receipts other than from service activities (e.g., sales of merchandise at wholesale or retail).

Although the figures shown here for number of establishments represent the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year.

See general note for Items 120–126.

Items 124–126. Payroll, paid employees, and active proprietors.

Source: Same as Items 120–123.

See text for Items 102–104 for definition of terms and general note for Items 120–126.

SELECTED SERVICES, 1954

Items 127–128. Establishments and sales.

Source: Same as Items 120–123.

For definition of terms, see text for Items 120–123. See also general note for Items 120–126. For some States, county figures do not add to State totals; see text for Items 96–97 for explanation.

MINERAL INDUSTRIES, 1958

Items 129–132. General note.

The 1958 Census of Mineral Industries covers all establishments primarily engaged in mining as defined in the 1957 edition of the *Standard Industrial Classification Manual* (see reference under general note, Items 86–95). The *SIC Manual* defines mining in the broad sense to include the extraction of minerals occurring naturally: Solids, such as coal and ores; liquids, such as crude petroleum; and gases, such as natural gas. Mining also includes quarrying, well operation, milling (crushing, screening, washing, flotation, etc.), and other preparation needed to render the material marketable, as well as exploration and development of mineral properties.

The crushing, grinding, or other treatment of certain earths, rocks, and other nonmetallic minerals not in conjunction with mining activities are excluded. Hauling and other transportation beyond the mine property and contract hauling (except out of open-pits in conjunction with mining) are also excluded.

Statistics on mining operations carried on as secondary activities at manufacturing establishments (such as clay pits at clay products plants or sand and gravel operations at ready-mixed concrete plants) are, insofar as possible, excluded from the figures shown.

The Census of Mineral Industries is conducted on an establishment basis. That is, a company carrying on mining or mineral preparation activities at more than one location is required, in general, to submit a report for each location; also, companies engaged in both mining and manufacturing activities at one location are required, in general, to submit separate reports.

A mineral establishment is generally defined as a single physical location where mineral operations are conducted; for example, a mine only, a mine and preparation plant, or a preparation plant only.

The minimum size for including establishments was limited to those employing one or more persons at any time during 1958 and for establishments with no employees, those with the value of shipments or reported expenditures amount to $500 or more. The same size limitations were applied in 1954.

The production of minerals, particularly stone, sand, and gravel, by Federal, State, and local governments is excluded. Also excluded is some production of these items by highway contractors who do not maintain separate records for sand and gravel production. Included are mining establishments operated entirely to serve other establishments of the same company, such as coal mines serving only coke ovens operated by the same company, oil and gas wells serving only refineries or public utilities owned by the same company, and copper mines and mills where all of the ore is transferred to a company-owned smelter.

State totals shown for establishments, employment, and payrolls are not necessarily the sum of the figures shown for counties. Discrepancies are due to the allocating procedures used to obtain county and State figures for companies operating oil and gas field properties and companies performing certain mining service operations. Only one report was required for all oil and gas field operations of a company in each State.

Items 129–131. Mining establishments, employees, and payroll.

Source: Bureau of the Census, *U.S. Census of Mineral Industries: 1958*, Vol. II, *Area Statistics.*

For definition of establishments, see general note for Items 129–132.

Employee figures include all full-time and part-time employees on the payrolls of the operators of mining establishments and mining contractor establishments who worked or received pay for any part of the pay period ended nearest the 15th of 4 specified months (see below). All persons on paid sick leave, paid holidays, and paid vacations during these pay periods are counted. Also included are employees of miners paid on a per ton, car, or yard basis. Excluded are: (a) Employees at the mine who were on the payroll of another employer (but employees of mining contractors are included in the reports for such contractors); (b) employees at company stores, boardinghouses, bunkhouses, and recreational centers; (c) members of the Armed Forces and pensioners on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded.

Employee figures were reported separately for "production and development workers" and for "all other employees." Figures for the former were for midmonth employment in March, May, August, and November; for the latter, only for mid-March employment. Thus, the figures for Item 130 are an average of the 4 monthly figures for the former group plus the March figure for the latter.

Payroll figures include the gross earnings paid in 1958 to all employees on the payroll of operating mining establishments. Included are salaries, wages, commissions, dismissal pay, bonuses, vacation and sick leave pay, and compensation in kind prior to such deductions as employees' social security contributions, withholding taxes, group insurance, union dues, and savings bonds. Excluded are payments to members of the Armed Forces and pensioners on the active payroll of mining establishments, royalty payments to unions, and costs of smithing, explosives, fuses, electric cap lamps, and mine supplies used in production and development work but charged to employees and deducted from their wages.

Item 132. Value of shipments and receipts.

Source: Same as Items 129–131.

Value of shipments is the net selling value, f.o.b., mine or plant, after discounts and allowances, and excluding freight charges.

"Shipments" include all products physically shipped from an establishment during 1958, including material withdrawn from stockpiles and products shipped on consignment, whether or not sold in 1958. Products transferred to other establishments of the same company or prepared on a custom basis are reported at approximate commercial value, not at the cost of production.

The figures include (a) the value of all primary products and of secondary products which are primary to other industries; (b) the receipts for contract work done for others (except custom milling); and (c) the value of products purchased and resold without further processing.

See general note for Items 129–132.

MINERAL INDUSTRIES, 1954

Item 133. Value of shipments and receipts.

Source: Bureau of the Census, *U.S. Census of Mineral Industries: 1954*, Vol. II, *Area Statistics*.

For definition of concepts, see text for Item 132. See general note for Items 129–132.

AGRICULTURE, 1954

Item 134. Land in farms.

Source: Bureau of the Census, *U.S. Census of Agriculture: 1959*, Vol. I, *Counties*.

Although the definition of land in farms was the same in the 1954 and 1959 Censuses of Agriculture (see text for Items 135–136), strict comparability was affected by a slight change in 1959 in the definition of a farm. In 1954, places of 3 or more acres were counted as farms if the annual value of agricultural products, whether for home use or for sale, but exclusive of home garden products, amounted to $150 or more. Places of less than 3 acres were counted as farms only if the annual sales of agricultural products amounted to $150 or more. A few places with very low agricultural production because of unusual circumstances, such as crop failure, were also counted as farms if they normally could have been expected to meet the minimum value or sales criteria. For definition of a farm in 1959, see text for Item 137.

See general note for Items 135–159.

AGRICULTURE, 1959

Items 135–159. General note.

These data are based on the Census of Agriculture conducted by the Bureau of the Census in the fall of 1959. Data on inventory items (land in farms, livestock, machinery and equipment, etc.) relate to the situation at the actual time of enumeration of each individual farm. Figures for acres, production, and sales of crops relate generally to the crops harvested during the crop year, regardless of whether and when they were sold, while data for sales of livestock and livestock products relate to the calendar year 1959. Since the enumeration was made before the end of 1959, special emphasis was placed upon the inclusion of estimates for crops yet to be sold and for livestock and livestock products expected to be sold in the period from the time of enumeration to the end of the calendar year.

Figures for many of the items shown here (such as economic class of farm, farm values, sales of dairy products and livestock, equipment and facilities, farm expenditures, and use of fertilizer and lime) are based on a sample of farms. The sample consisted of (a) all farms with a total area of 1,000 acres or more or with estimated sales of $100,000 or more in 1959, and (b) approximately 20 percent of all other farms. The State totals for the sample items may not equal the sum of the county figures since State totals were obtained in a different series of tabulations. These and other slight discrepancies were not reconciled unless the differences were large enough to affect the usefulness of the data.

Items 135–136. Land in farms.

Source: Same as Item 134.

Land area in farms consists primarily of "agricultural" land—that is, land used for crops and pasture or grazing. It also includes considerable areas of land not actually under cultivation nor used for pasture or grazing. For example, the entire acreage of woodland and wasteland owned or rented by farm operators is included as land in farms, unless it was being held for nonagricultural purposes or unless the acreage was unusually large. If a place had 1,000 or more acres of wasteland and of woodland not pastured, and if less than 10 percent of the total acreage in the place was used for agricultural purposes, the acreage of woodland not pastured and wasteland was reduced to equal the acreage used for agriculture.

Except for open range and grazing land used under Government permit, all grazing land was included as land in farms provided the place of which it was a part was a farm. Grazing land operated by grazing associations was reported in the name of the person chiefly responsible for conducting the business of the association. Land used rent-free was reported as land rented from others. All land in Indian reservations that was used for growing crops or grazing livestock was included. Land in Indian reservations that was not reported by individual Indians and that was not rented to non-Indians was reported in the name of the cooperative group that used the land. In some instances, an entire Indian reservation was reported as one farm.

Land in an individual farm may be located in two or more counties. In such a case, the entire farm was enumerated in only one county. If the farm operator lived on the farm, the farm was counted in the county in which the farm operator lived. If the farm operator did not live on the farm, the figures for the farm were included in the county in which the farm headquarters was located. If there was any question as to the location of the headquarters of the farm, the farm was counted in the county in which most of the land was located. As a result of this procedure, the figures for land in farms for some counties are larger than the figures for the entire land area of the counties.

The approximate total land area of States and counties as reported for 1959 is, in general, the same as that reported for all censuses beginning with 1940. Such differences as are shown reflect political changes in boundaries or actual changes in land area caused by changes in the number or size of reservoirs, lakes, streams, etc. For Alaska, the areas for election districts represent the gross area of land and water.

See general note for Items 135–159.

Item 137. All farms.

Source: Same as Item 134.

Farms include all places of 10 or more acres with estimated annual sales of agricultural products amounting to at least $50. Places of less than 10 acres were counted as farms if the estimated sales of products in 1959 amounted to at least $250. Places having less than the $50 or $250 minimum estimated sales in 1959 were also counted as farms if they could normally be expected to produce agricultural products in sufficient quantity to meet the requirements of the definition. This additional qualification resulted in the inclusion as farms of some places engaged in farming operations for the first time in 1959 and places affected by crop failure or other unusual conditions.

See general note for Items 135–159.

Items 138–144. Size and economic class of farms.

Source: Same as Item 134.

Farms were classified by size according to the total land area of each farm. In the analysis of size-of-farm statistics, consideration should be given to the definition of a farm. For purposes of the Census of Agriculture, farms are essentially operating units, not ownership tracts. If a landlord has croppers or other tenants, the land assigned each cropper or tenant is a separate farm even though the landlord may operate the entire holding as one farm in respect to supervision, equipment, rotation practices, purchase of supplies, or sale of products.

The figures for economic class of farms are based on a sample of farms. Commercial farms, in general, are all farms with sales amounting to $2,500 or more. In addition, farms with sales of $50 to $2,499 were classified as commercial if the farm operator was under 65 years of age and (a) did not work off the farm 100 days or more during the year and (b) the income received by the operator and members of his family from nonfarm sources was less than the value of all farm products sold.

Farms were defined as "part-time" if sales of farm products amounted to $50 to $2,499 and (a) the operator was under 65 years of age and worked off the farm 100 days or more, or, (b) the income he and members of his household received from nonfarm sources was greater than the total value of farm products sold.

See general note for Items 135–159.

Item 145. Farms operated by tenants, 1959.

Source: Same as Item 134.

Tenants rent from others or work on shares for others all the land they operate. Rental arrangements between owner and tenant may be on the basis of cash rent, sharing of crops, sharing of livestock or livestock products, furnishing of work power by the landlord, or any combination of such arrangements.

See general note for Items 135–159.

Items 146–147. Value of land and buildings, 1959.

Source: Same as Item 134.

Figures are based on a sample of farms and represent farm operators' estimates of the market value of the land and the buildings on that land. Market value is defined as the price which a farm operator would expect to receive for the land and buildings if he were to sell them on the day of enumeration. Estimates of market value are based almost entirely on opinion. Since the majority of farms have not changed hands for many years and are not currently for sale, the operators are not likely to have any clear basis for estimating the value. Because of the extent of variation that is known to exist in real estate values, it is difficult to devise checking procedures that will identify inaccurate estimates.

See general note for Items 135–159.

Items 148–152. Value of farm products sold.

Source: Same as Item 134.

Figures for the value of farm products sold in 1959 were obtained by census enumerators directly from farm operators for the following products: Vegetables; nursery and greenhouse products; standing timber; miscellaneous forest products; miscellaneous poultry products; milk and cream; and cattle, calves, horses, mules, colts, and ponies. For all other agricultural products, the value of sales was estimated by the Census Bureau. The State average prices used for calculating the value of farm products sold were furnished to the Census Bureau by the former Agricultural Marketing Service of the Department of Agriculture.

All sales data relate to one year's farm operations. Crop sales are for crops harvested during the crop year, whether the crops were actually sold immediately after harvest or placed in storage for later sale. Sales of livestock and livestock products relate to the calendar year, regardless of when the livestock or products were raised or produced. All wool and mohair reported as shorn or clipped was considered as sold. The value of quantities sold was defined as the gross value, with no deductions for feed, seed, fertilizer, water, labor, or marketing costs. For some products, however, net values may have been reported. For tenant-operated farms, the landlord's share of products was considered as sold, provided it was moved off the tenant farm. All crops, livestock, and poultry raised under a contract arrangement were considered as sold from the farm where they were raised. For institutional farms, all agricultural items produced on land operated by the institutions and consumed by the inmates were considered as sold.

See general note for Items 135–159.

Item 153. Cattle and calves.

Source: Same as Item 134.

Figures are based on a sample of farms and relate to cattle and calves on farms at the time of census enumeration. All cattle and calves, including those being kept or fed under contract, were enumerated on the farm or ranch where they were, regardless of who owned them. Animals in transit from one grazing area to another or grazing in national forests, grazing districts, open range, or on land used under permit were reported as being on the place where the person who had control over them had his headquarters.

See general note for Items 135–159.

Items 154–156. Farm equipment.

Source: Same as Item 134.

Figures are based on a sample of farms and refer to equipment that was on the farm, regardless of ownership. Equipment that was temporarily out of order was included; worn-out equipment was excluded.

Motortruck figures include pickup trucks and truck-trailer combinations. Jeeps and station wagons were included if they were used primarily as trucks; school buses were specifically excluded.

See general note for Items 135–159.

Items 157–158. Farm expenditures.

Source: Same as Item 134.

Figures are based on a sample of farms.

Feed purchased for livestock and poultry includes expenditures for grain, hay, millfeeds, pasture, salt, condiments, concentrates, and mineral supplements as well as for the grinding and mixing of feed. The estimated cost of items furnished by a landlord, contractor, or other owner for feeding poultry and livestock kept on the farm is also included. Payments made by a tenant to his landlord for feed grown on the tenant farm are excluded.

Expenditures for hired labor include total cash payments made in 1959 to family members and to others for farm labor. Payments to persons supplied by a contractor or a cooperative organization and paid directly by them or by the crew boss are also included. Payments for the following types of work are excluded: Housework; contract construction work; custom machine work; and repair, installation, or construction work done by persons specifically employed for such work.

See general note for Items 135–159.

Item 159. Commercial fertilizer used.

Source: Same as Item 134.

Figures are based on a sample of farms and refer to commercial fertilizer and fertilizing materials, including rock phosphate. They include quantities used in 1959 regardless of when or by whom the fertilizer and lime were purchased.

See general note for Items 135–159.

Items 160–161. Farm-operator level-of-living index, 1950 and 1959.

Source: Department of Agriculture, Economic Research Service, *Farm-Operator Level-of-Living Indexes for Counties of the United States, 1950 and 1959*, 1962.

This index is constructed so that the average county in the Nation in 1959 has an index of 100. These indexes are based on five items of information available from the 1950 and 1959 Censuses of Agriculture for each county in the United States. *These indexes are not comparable with any indexes previously published.*

Farm-operator level-of-living indexes indicate differences between geographic areas and changes over time. They do not include measures of all the goods, services, and other satisfactions related to the level of living. These farm-operator level-of-living indexes are based on five items as follows: (1) Average value of land and buildings per farm, (2) average value of sales per farm, (3) percent of farms with automobiles, (4) percent of farms with home freezers, and (5) percent of farms with telephones. Items (1) and (2), relating to dollar values, were adjusted for changes in the purchasing power of the farmer's dollar between 1950 and 1959.

The data were obtained on a sample basis and are subject to sampling variability. Counties with fewer than 500 farms in 1959 were combined with an adjacent county and an index was computed for the combined counties. Except for average value of farm sales, the index is based on preliminary results from the 1959 Census of Agriculture. The final results from the 1950 Census of Agriculture were used in computing the 1950 indexes.

For a detailed discussion of the sources of data, methods of analysis, and derivation of the index, see the source publication.

POPULATION AND AREA, 1960

Items 301–314. Land area and population characteristics.

Source: Same as Item 1.

For explanatory notes, see general note for Items 1–49 and text for Items 1, 2–3, 4, 5, 6–7, 8, 9, 10–13, and 14–15.

The 1950 Census of Population figures for cities apply to the area of each city in 1950. The percent change in population between 1950 and 1960, shown in Item 305, reflects the effect of any annexations or detachments which occurred to particular cities during that period. This qualification also applies to the percent of the nonwhite population shown in Items 306 and 307.

Items 315–316. Married couples.

Source: Same as Item 1.

A married couple is defined as a husband and his wife enumerated as members of the same household.

A married couple with own household is one in which the husband is the household head. Married couples living in households in which the husband is not the household head are excluded.

See general note for Items 1–49 and text for Item 21.

VITAL STATISTICS

Items 317–318. Live births, 1960, and deaths, 1959.

Source: Same as Items 18–19.

For explanatory notes, see text for items 18–19.

FAMILIES, 1960, AND INCOME, 1959

Items 319–323. Families, 1960, and income in 1959 of families.

Source: Same as Item 1.

For explanatory notes, see text for Items 21, 22–24, and 25.

EDUCATION, 1960

Items 324–330. School years completed by the population 25 years old and over, and school enrollment of persons 5 to 34 years old.

Source: Same as Item 1.

For explanatory notes, see text for Items 26–28 and 29–31.

MIGRATION, 1960

Items 331–332. Residents in same house in 1960 as in 1955, and migrants from different county.

Source: Same as Item 1.

The category "residents in same house" includes all persons 5 years old and over who were reported as living in the same house on April 1, 1960, that they were living in five years prior. Among the residents included are those who had never moved during the five years and those who had moved but who, by 1960, had returned to their 1955 residence.

For definition of "migrants from different county," see text for Item 32.

CIVILIAN LABOR FORCE, 1960

Items 333–348. Civilian labor force.

Source: Same as Item 1.

For explanatory notes, see text for Items 34–36, 37–46, 47, 48, and 49.

HOUSING, 1960

Items 349–371. Dwelling units, 1950, housing units and selected housing characteristics, 1960.

Source: Same as Items 50–51.

For explanatory notes, see text for Items 50–51, 52, 53, 54, 55, 56, 57, 58, 59, 60–61, 62–63, 64–65, and 66–72.

MANUFACTURES, 1958

Items 372–379. Establishments, employees, production workers, value added by manufacture, and capital expenditures.

Source: Same as Items 86–88.

For explanatory notes, see text for Items 86–88, 89–90, 91–93, 94, and 95.

MANUFACTURES, 1954

Items 380–381. Employees and value added by manufacture, unadjusted.

Source: Same as Items 86–88.

For explanatory notes, see text for Items 89–90, 94, and 96–97.

RETAIL TRADE, 1958

Items 382–388. Establishments, sales, payroll, employees, and active proprietors.

Source: Same as Items 98–99.

For explanatory notes, see text for items 98–99, 100–101, and 102–104.

Items 389–404. Establishments and sales, by kind of business.

Source: Same as Items 98–99.

For explanatory notes concerning establishments and sales, see Items 98–99 and 100–101.

The lumber, building materials, hardware, and farm equipment dealers group includes establishments primarily selling lumber; building materials; the basic lines of hardware, paint, wallpaper, glass, and electrical supplies; roofing materials; other supplies and equipment for home construction; and farm equipment. Establishments in this group sell to contractors as well as to the general public.

For explanatory notes for the general merchandise group, see text for Items 105–106; for food stores, see Items 107–108; for automotive dealers, see Items 109–110.

Figures for gasoline service stations include establishments primarily selling gasoline and other automotive petroleum products and establishments called garages (provided they derived the larger part of their receipts from gasoline and oil sales).

Figures for apparel and accessories stores include establishments primarily engaged in selling clothing of all kinds and related articles for personal wear and adornment. Establishments which meet the criteria for department stores or general merchandise stores, even though most of their receipts are from the sale of apparel and apparel accessories, are excluded.

Figures for furniture, home furnishings, and equipment stores include establishments primarily selling merchandise used in furnishing the home, such as furniture, floor coverings, draperies, glass and chinaware, domestic stoves, refrigerators, and other household gas and electrical appliances, including radio and TV sets. Also included are musical instrument stores and music and record shops.

Figures for eating and drinking places include establishments primarily selling prepared foods and drinks for consumption on their own premises. Examples of such places are restaurants, lunchrooms, cafeterias, refreshment stands, and drinking places (alcoholic beverages). Also included are caterers (who sell prepared foods for serving at a place designated by the customer), in-plant food contractors, and railroad dining-car facilities.

RETAIL TRADE, 1954

Items 405–406. Establishments and sales.

Source: Same as Items 98–99.

For explanatory notes, see text for Items 98–99 and 100–101.

WHOLESALE TRADE, 1958

Items 407–412. Establishments, sales, payroll, employees, and merchant wholesalers.

Source: Same as Items 113–114.

For explanatory notes, see text for Items 113–114, 115–116, and 117–118.

WHOLESALE TRADE, 1954

Item 413. Sales.

Source: Same as Item 119.

For explanatory notes, see text for Items 113–114.

SELECTED SERVICES, 1958

Items 414–421. Establishments, receipts, payroll, employees, and active proprietors.

Source: Same as Items 120–123.

For explanatory notes, see text for Items 120–123 and 124–126.

Items 422–427. Establishments and receipts, by kind of business.

Source: Same as Items 120–123.

Figures for personal services include barber and beauty shops, cleaners and laundries, diaper services, funeral homes, shoe and garment repair shops, turkish baths, reducing salons, photographic studios, and other establishments primarily engaged in providing services generally involving the care of a person or his apparel.

Figures for automobile repair and services and for garages include establishments primarily furnishing general automobile repairs and establishments specializing in repairing or rebuilding certain parts of an automobile, such as the radiator, body, tires, glass (windows), or brakes. This group also includes parking lots and structures, and automobile and truck rental services. Automobile repair departments maintained by establishments engaged in the sale of new automobiles are covered under retail trade.

Figures for hotels, motels, tourist courts, and camps include establishments engaged in providing lodging, or lodging and meals, to the general public except (a) rooming and boarding houses, (b) hotels providing accommodations only for permanent residents, and (c) tourist homes. Apartment or residential hotels which provide accommodations for transients are also included.

See text for Items 120–123.

SELECTED SERVICES, 1954

Items 428–429. Establishments and receipts.

Source: Same as Items 120–123.

For explanatory notes, see text for Items 120–123.

BANKING, 1960

Items 430–431. Demand deposits and bank debits to deposit accounts.

Source: Board of Governors of the Federal Reserve System, records.

The coverage of all commercial banks in the cities for which data are shown here is complete, or practically so. In some areas, banks or branches outside of the specified city are included. Variations of more than 10 percent from complete coverage are indicated by footnotes.

Deposits are as of December 31 and comprise demand deposit accounts of individuals, partnerships, and corporations, and of State and local governments. Bank debits to demand deposit accounts are calendar-year data and include: (a) Debits (e.g., withdrawals) or charges to demand deposit accounts of individuals, partnerships, and corporations, and of State and local governments; and (b) payments from trust funds on deposit in the banking department. Excluded are debits to United States Government deposit accounts, payments of certified and officers' checks, payments in settlement of clearinghouse balances, charges to expense and miscellaneous accounts, corrections, and similar charges, and debits to the accounts of other banks, that is, to interbank accounts.

ELECTRIC BILLS, 1960

Items 432–433. Typical net monthly commercial and residential electric bills.

Source: Federal Power Commission, *Typical Electric Bills*, 1961.

Figures are based on rate schedules applicable to the area within corporate limits of the city shown. The commercial bill represents 12 kilowatt demand (the maximum quantity demanded at any one moment), 1500-kilowatt-hour monthly use, and covers service supplied to commercial and business establishments such as stores, offices, and restaurants where the service is used for lighting and incidental power service. The 250 kw.-hr. monthly residential bill covers basic residential services, excluding water heating, which, in many communities, is supplied by other sources of energy.

For a number of cities, two or more typical bills are shown in the source publication. Wherever known, the bill which represented the majority of customers is shown here. For commercial bills, it was not always possible to know exactly which bill represented the majority of customers. In such cases, the rate schedules were reviewed by the Federal Power Commission, and, based on the information in these schedules, the bill which probably represented the majority of the customers was selected.

HOSPITALS, 1960

Items 434–437. Hospitals, beds, admissions, and personnel.

Source: The American Hospital Association, *Hospitals*, Guide Issue, Part II, Chicago, Ill., 1961.

These data are a summarization of the figures published for individual hospitals accepted for listing in the source publication. Data are for the year ending September 30, 1960, or for the fiscal year ending closest to that date.

The data cover hospitals of all types, but coverage varies. It is fairly complete for general hospitals, tuberculosis hospitals, mental hospitals, and Federal Government hospitals. Excluded almost entirely are institutions and services commonly referred to as convalescent and resting homes, nursing homes, maternity hospitals, infirmaries, old-age homes, sanatoriums, etc.

The number of beds shown includes beds, cribs, and pediatric bassinets normally available for inpatients; it excludes bassinets for newborn infants.

Admissions comprise the number of patients accepted for inpatient service during the year, but do not include births.

Personnel includes all full-time personnel and full-time equivalents of part-time personnel; it excludes interns, residents, and students.

Data on number of hospitals and beds include recently established hospitals; data on number of admissions and on personnel, however, were not available for such hospitals.

CITY GOVERNMENT EMPLOYMENT, OCTOBER 1960

Items 438–439. Full-time employees and payroll, 1960.

Source: Bureau of the Census, *City Employment in 1960*, and records.

Figures relate only to municipal corporations and their dependent agencies. They do not include other local governments overlying city areas, as, for example, separate school districts which administer the public schools within most municipal areas. They do, however, include public schools for those cities which administer the public school system. Variations in the assumption of other governmental responsibilities also have an important effect upon the figures reported for various cities.

CITY GOVERNMENT FINANCES, 1960

Items 441–445. General revenue.

Source: Bureau of the Census, *Compendium of City Government Finances in 1960*, and records.

For explanatory notes relating to general revenue and taxes, see general note for Items 78–82 and text for Items 78–79.

Sales and gross receipts taxes are taxes (including licenses other than those at nominal rates) based on the volume or value of transfers of goods or services, or on gross receipts therefrom, and related taxes based on use, storage, production, importation, or consumption of goods.

Intergovernmental revenue includes revenue received from other governments as fiscal aid or as reimbursement for general government services rendered for the paying government. Figures exclude payments for property, commodities, and utility services sold to other governments.

Charges and miscellaneous general revenue includes current charges, special assessments, and all other general revenue except taxes and intergovernmental revenue.

See text for Items 438–439.

Items 446–454. General expenditure.

Source: Same as Items 441–445.

For explanatory notes relating to total general expenditure and to education expenditure, see general note for Items 78–82 and text for Items 80–81.

Police expenditure covers costs of preservation of law and order and of traffic safety. It includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, vehicular inspections, and the like.

Fire expenditure covers cost of city firefighting organizations and auxiliary services, inspection for fire hazards, and other fire prevention activities.

Highways expenditure includes expenditure for streets, highways, and structures necessary for their use, snow and ice removal, toll highway and bridge facilities, and ferries.

Sanitation expenditure includes expenditure for sewers and sewage disposal, street cleaning, and waste collection and disposal. Specific amounts for snow and ice removal are reported under highways expenditure. Sanitary engineering, smoke regulation, and other environmental health services are classified under health expenditure.

Public welfare expenditure includes assistance to needy persons, contingent upon their need.

Health expenditure relates to public health services, including: (a) Research, nursing, immunization, maternal and child health, and school health activities of health agencies (rather than school agencies); and (b) categorical, environmental, and general health activities.

Hospital expenditure includes expenditure for public hospital facilities and services, and any local government support of privately operated hospitals.

Interest on general debt includes all expenditure for use of borrowed money for other than utility purposes.

Item 455. Debt outstanding, end of year.

Source: Same as Items 441–445.

For explanatory notes, see text for Item 82.

CLIMATE

Items 456–463. General note.

Many of the cities for which data are shown here, especially those which adjoin large metropolitan centers, do not have official weather stations. For most of these cities, observations from nearby stations having approximately the same climatic conditions have been substituted, as indicated by footnotes. (See Appendix C for the complete list of these cities and the nearby stations which have been substituted.) No temperature data are given for 19 cities as there were no nearby representative stations with a sufficient period of record to provide mean values.

Items 456–457. Mean temperature for January and July.

Source: Weather Bureau, *Decennial Census of United States Climate—Monthly Normals of Temperature, Precipitation, and Heating Degree Days (1931–1960)*, 1962; *Climatological Data*, monthly and annual; and *Local Climatological Data*, monthly and annual.

For most stations mean temperature figures are based on the period 1931–1960. The means are adjusted to represent observations taken at the present standard location.

See general note for Items 456–463.

Items 458–459. Record high and low temperature.

Source: Same as for Items 456–457.

Record temperature figures represent the highest and lowest temperatures ever recorded. While these figures are related to the length of record (which is not strictly uniform for all cities shown), they are considered adequate for usual comparisons. It should be borne in mind, however, that they indicate extreme conditions and that temperatures approaching these figures occur infrequently.

See general note for Items 456–463.

Items 460–463. Mean annual precipitation, possible sunshine, hourly wind speed, and degree days.

Source: Same as for Items 456–457.

Mean annual precipitation figures are derived in the same manner as the mean temperature figures (see text for Items 456–457).

Mean annual percent figures of possible sunshine are for stations having automatic sunshine recorders for a considerable period of time and for which sunshine records have been summarized. These percents represent the relationship between the number of hours of sunshine as recorded by instrument and the number of hours between sunrise and sunset for each day during the year.

Mean annual hourly wind speed figures were taken from records at stations equipped with wind instruments. The means represent averages of the hourly wind speed for the period of record.

Mean annual degree days, 65° base, is the mean of the annual sums of the differences between 65° and the daily mean temperatures below 65°. Temperatures of 65° or higher do not affect the degree day total. The data were compiled from the total number of degree days each month for the period 1931–1960. The degree day figure is based on the assumption that the amount of fuel or heat used per day to heat buildings to a temperature of approximately 70° is proportional to the number of degrees that the outside temperature falls below 65°.

See general note for Items 456–463.

[1] Vote for Democratic Party was 1,385,415; for Republican Party, 1,363,324.
[2] Vote for Democratic Party was 2,377,846; for Republican Party, 2,368,988.
[3] Democratic Party received a larger number of votes than Republican Party, but fewer votes than "other" party or parties.
[4] Vote for Democratic Party was 92,410; for Republican Party, 92,295.

Table 1.—REGIONS, DIVISIONS, AND STATES

["n" denotes statistics not available. Percent not shown where less than 0.1]

Region, division, and State	Vital statistics			Number of families, 1960	Income in 1959 of families, 1960			Aggregate income in 1959 of the population, 1960	Education, 1960						Migration, 1960	
									Population, 25 years old and over			School enrollment, persons 5 to 34 years old				
	Live births, 1960	Deaths, 1959	Marriages, 1960		Median income	Under $3,000	$10,000 and over		Median school years completed	Completed less than 5 years of school	Completed high school or more	Kindergarten and elementary school	High school	College	Migrants from different county [1]	Net gain or loss (−) through civilian migration, 1950–1960

[1] Professional, managerial (except farm), clerical, and sales.
[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 1.—REGIONS, DIVISIONS, AND STATES

["n" denotes statistics not available]

Region, division, and State	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied			
											Total	Median value	Total	Median gross rent per month	Total	For rent
	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65

[1] Other than dairy and poultry.
[2] Excludes Alaska and Hawaii.
[3] Includes Alaska, but excludes Hawaii.
[4] Sales of whole milk only.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where less than 0.1. Percent and median not shown where base is less than 100 for items 5-13, less than 200 for items 14-15. For item 17, "D" and "R" denote Democratic and Republican parties, respectively]

Codes			County	Land area	Population, 1960														Vote cast for President, 1960

[1] Gross area in square miles.
[2] Per 100 square miles.
[3] Includes 4,882 absentee votes not distributed by election districts.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where less than 0.1. Percent and median not shown where base is less then 200]

County	Vital statistics			Number of families, 1960	Income in 1959 of families, 1960			Aggregate income in 1959 of the population, 1960	Education, 1960						Migration, 1960	
	Live births, 1960	Deaths, 1959	Marriages, 1960		Median income	Under $3,000	$10,000 and over		Population, 25 years old and over			School enrollment, persons 5 to 34 years old			Migrants from different county [1]	Net gain or loss (–) through civilian migration, 1950–1960
									Median school years completed	Completed less than 5 years of school	Completed high school or more	Kindergarten and elementary school	High school	College

[1] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations. [2] Includes all other election districts, not shown separately. [3] Less than 0.05 percent.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where base is less than 100]

County	Agriculture, 1959														Farm-operator family level-of-living index

[1] Excludes data for Uranium-radium-vanadium ores industry. [2] Land area reported in farms is in excess of total land area; see text for explanation. [3] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

---

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied			
											Total	Median value	Total	Median gross rent per month	Total	For rent

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month		
	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65

[1] Excludes data for Uranium-radium-vanadium ores industry. [2] District of Columbia included with Delaware. Not shown separately. [3] Delaware includes District of Columbia and Maryland. Not shown separately. [4] Includes data for separately reported central offices and related facilities in the Oil and Gas Extraction Industries. [5] Land area reported in farms is in excess of total land area; see text for explanation. [6] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (–) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month

[1] Less than 500. [2] Land area reported in farms is in excess of total land area; see text for explanation. [3] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where base is less than 100]

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month		
	50	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960													
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		
											Total	Median value	Total	Median gross rent per month	Total	For rent

---

[1] Excludes data for Uranium-radium-vanadium ores industry. [2] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations. [3] Land area reported in farms is in excess of total land area; see text for explanation.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where base is less than 100]

[1] Land area reported in farms is in excess of total land area; see text for explanation. [2] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month

[1] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

[2] Land area reported in farms is in excess of total land area; see text for explanation.

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month

[1] Land area reported in farms is in excess of total land area; see text for explanation.

[2] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month

[1] Statistics shown for parishes, which correspond to counties in other States.

[2] Republican Party received a larger number of votes than the Democratic Party but fewer than "other" party or parties.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where less than 0.1. Percent and median not shown where base is less then 200]

County	Vital statistics			Number of families, 1960	Income in 1959 of families, 1960			Aggregate income in 1959 of the population, 1960	Education, 1960						Migration, 1960	
									Population, 25 years old and over			School enrollment, persons 5 to 34 years old				
	Live births, 1960	Deaths, 1959	Marriages, 1960		Median income	Under $3,000	$10,000 and over		Median school years completed	Completed less than 5 years of school	Completed high school or more	Kindergarten and elementary school	High school	College	Migrants from different county[1]	Net gain or loss (−) through civilian migration, 1950–1960

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

[3] Statistics shown for parishes, which correspond to counties in other States.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied			
											Total	Median value	Total	Median gross rent per month	Total	For rent

[1] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

[2] Statistics shown for parishes, which correspond to counties in other States.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where base is less than 100]

[1] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations. [2] Includes District of Columbia and Delaware. Not shown separately. [3] Baltimore County includes Baltimore city.

Table 2.—COUNTIES

---

[1] Professional, managerial, (except farm), clerical, and sales.
[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month

---

[1] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations. [2] Includes figures for capital expenditures. [3] Includes figures for separately reported central offices and related facilities.

[4] Land area reported in farms is in excess of total land area; see text for explanation.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where base is less than 100]

[1] Land area reported in farms is in excess of total land area; see text for explanation. [2] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where base is less than 100]

County	Agriculture, 1959														Farm-operator family level-of-living index	
	Value of land and buildings		Value of farm products sold					Cattle and calves	Farms with—			Farm expenditures		Commercial fertilizer used		
	Average per farm	Average per acre	Total	All crops	Dairy products	Poultry and poultry products	Livestock and livestock products[1]		Telephone	Tractors	Motor-trucks	Feed for livestock and poultry	Hired labor		1959	1950

Yellowstone National Park (part)	...	...	...	...	d	...	...	...	...	...	...	...	...	...	...	...	...

[1] Land area reported in farms is in excess of total land area; see text for explanation. [2] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

Table 2.—COUNTIES

[1] Professional, managerial (except farm), clerical, and sales.

[2] Based on persons who worked during census week. Includes members of Armed Forces.

Table 2.—COUNTIES

[Median not shown where base is insufficient; plus (+) or minus (−) after number indicates median above or below that number]

County	Dwelling units, 1950	Housing units, 1960														
		Total	Median number of rooms per unit	In one-unit structures	In structures built in 1950 or later	Sound, with all plumbing facilities	Occupied units								Vacant units, year-round available	
							Total	Population per unit	With 1.01 or more persons per room	Moved into unit during 1958 to 1960	Owner occupied		Renter occupied		Total	For rent
											Total	Median value	Total	Median gross rent per month

[1] Land area reported in farms is in excess of total land area; see text for explanation.

[2] Includes data for mining operations in manufacturing establishments. For value of shipments and receipts, includes the estimated value of minerals produced and used in the same establishment at such operations.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where base is less than 100]

County	Agriculture, 1959														Farm-operator family level-of-living index

---

[1] Less than 0.5 square mile.

[2] Includes Manchester Standard Metropolitan Statistical Area (111).

[3] Includes part of Lawrence-Haverhill Standard Metropolitan Statistical Area (096).

[4] Vote for Democratic Party was 1,385,415; for Republican Party, 1,363,324.

Table 2.—COUNTIES

["n" denotes statistics not available. Percent not shown where less than 0.1. Percent and median not shown where base is less then 200]

County	Vital statistics			Number of families, 1960	Income in 1959 of families, 1960			Aggregate income in 1959 of the population, 1960	Education, 1960						Migration, 1960	
									Population, 25 years old and over			School enrollment, persons 5 to 34 years old				
	Live births, 1960	Deaths, 1959	Marriages, 1960		Median income	Under $3,000	$10,000 and over		Median school years completed	Completed less than 5 years of school	Completed high school or more	Kindergarten and elementary school	High school	College	Migrants from different county [1]	Net gain or loss (−) through civilian migration, 1950–1960
